1 Introduction

This annex presents the matrices completed in the appraisal of the strategies and policies of the Submission Core Strategy. The mitigation measures and recommendations put forward by the consultants have been responded to by policy authors and an indication of how the final policy performs, following changes made by policy authors in response to mitigation and recommendations is given in the summary of the appraisal, at the end of each matrix.

2 Appraisal Matrices

The appraisal matrices are presented below. In line with the iterative nature of the assessment, and in order for recommendations to be taken on board in the draft Core Strategy (Publication Version), the appraisal was completed on an earlier officer-draft version of the draft Core Strategy (dated 27th September 2010). Some of the references (including page numbers, paragraphs and phraseology) that appear in the appraisal matrices will therefore not directly align to the Submission version of the Core Strategy. Please note that changes to the appraisal matrices made as a result of changes to the Submission Core strategy DPD are included in **red text**.

One matrix is presented for each of the following:

Policy or Strategy of the Submission Core Strategy	Page number
Vision and Objectives	2
District Strategy	12
Shaping the Future of Bath A Spatial Strategy	25
Keynsham Spatial Strategy	41
Somer Valley Spatial Strategy	49
Rural Areas Spatial Strategy	58
Core Policies:	
Energy Hierarchy, CPI Retrofitting Existing Buildings, CP2 Sustainable Construction, CP3 Renewable Energy, CP4 District Heating	71
CP5 Flood Management	79
CP6 Environmental Quality	84
CP7 Green Infrastructure	92
CP8 Green Belt	98
CP9 Affordable Housing and CP10 Housing Mix	105
CP11 Gypsies, Travellers & Travelling Showpeople Policy	113
CP12 Centres and Retailing	127
CP13 Infrastructure Provision Policy	135

Please note that due to the size of this document the appraisal matrices are produced in Arial 10 font, the document is available in larger font on request from the planning policy team.

Vision and Objectives							
SA Objectives	Detailed questions: Does the policy ...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
Objective 1: Improve accessibility to community facilities and local services	<p>Help everyone access basic services easily, safely and affordably</p> <p>Increase access to and participation in community and cultural facilities and activities</p>	+	+	+	<p>The vision makes reference to realising the cultural and social potential of the district, providing opportunities for all and ensuring competitive and healthy urban centres. The vision also includes the cultural assets of Bath; the roles of Keynsham, Midsomer Norton and Radstock as service centres.</p> <p>Strategic objective 5 aims to improve city, town and local centres for social activity as places to entertainment, culture and shopping. Strategic objective 5 includes a bullet point 'protecting and enhancing the range of services and facilities provided in local, neighbourhood and village centres' and a bullet point improving pedestrian and cycle routes into and within town and city centres. Strategic objective 8 also includes a bullet point on promoting improved access to services especially for rural and more remote areas.</p>	<p>Recommendation: The vision could be more specific in addressing this SA Objective by making reference within the first two paragraphs to people meeting their needs locally or having good access to community facilities and local services.</p>	No change. Note objective 6 which includes reference to the timely provision of infrastructure (including services/facilities) in line with new development.
Objective 2: Improve the health and well-being of all communities	<p>Improve Health</p> <p>Reduce Health inequalities</p> <p>Promote</p>	++	++	++	<p>The vision makes reference to providing opportunities for all and achieving healthy centres. Healthy centres is a broad concept and this may relate to both vitality of businesses and air quality etc.</p> <p>Strategic objective 7 relates to health and wellbeing which addresses all of the SA</p>		n/a

Vision and Objectives							
SA Objectives	Detailed questions: Does the policy ...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
	healthy lifestyles, especially routine daily exercise				appraisal questions.		
Objective 3: Meet identified needs for sufficient, high quality and affordable housing	Help make suitable housing available and affordable for everyone	++	++	++	<p>The vision refers to providing opportunities for all and providing new housing supported by necessary infrastructure and providing housing in ways that mitigates for climate change and adapts to unavoidable climatic changes.</p> <p>Strategic objective 6 relates to meeting housing needs including affordable housing and housing that meets the needs of the district's population. Strategic objective 3 includes ensuring high quality design.</p>		n/a
Objective 4: Promote stronger more vibrant and cohesive communities	Promote stronger more cohesive communities	+	+	+	<p>The vision includes reference to achieving flourishing urban and rural communities.</p> <p>Strategic objective 7 makes reference to encouraging social interaction in the context of facilitating more active modes of travel and designing high quality, safe and secure streets and spaces and also refers to reducing social inequalities across the district.</p>	<p>Recommendation: the vision or objectives should make specific reference to achieving cohesive communities. This could be specifically in relation to new housing developments under strategic objective 6.</p>	No change. Not within the scope of the Core Strategy.

Vision and Objectives							
SA Objectives	Detailed questions: Does the policy ...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
					The vision and strategic objectives contain some elements which work towards achieving cohesive communities but do not directly address community cohesion and therefore could be improved.		
Objective 5: Reduce anti-social behaviour, crime and the fear of crime	Reduce crime and fear of crime	++	++	++	The vision makes reference to healthy town and city centres and improving the appearance of town centres such as Keynsham and Midsomer Norton. Strategic objective 5 also aims to improve the public realm within the city and town centres. Strategic objective 7 include designing high quality, safe and secure streets and spaces and promoting and delivering regeneration opportunities that can contribute to a reduction in the social inequalities across the district.		n/a
Objective 6: Improve the availability and provision of training	Give everyone access to learning, training, skills and knowledge	+	+	+	The vision makes reference to realising the economic, cultural and social potential of the district, providing opportunities for all. Strategic objective 4 includes a bullet point on improving educational facilities to help provide the skills that support knowledge based sectors. Neither the strategic objectives or the vision refer to addressing skills issues in Midsomer	Recommendation: The second to last paragraph of the vision and strategic objective 4 should include improving skills in Midsomer Norton and Radstock with reference to improving local job opportunities and supporting the local economy through	Agree – Somer Valley vision amended to refer to improving skills and reference also added into strategic objective no. 3.

Vision and Objectives							
SA Objectives	Detailed questions: Does the policy ...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
					Norton and Radstock where there are recognised opportunities to improve skills of the local workforce and thereby attract employers and therefore the vision and objectives could be improved.	attracting new employers.	
Objective 7: Ensure communities have access to a wide range of employment opportunities, paid or unpaid	<p>Give everyone in the region access to satisfying work opportunities, paid or unpaid</p> <p>Reduce poverty and income inequality</p> <p>Provide a diverse range of employment opportunities in a variety of sectors</p>	+	+	+	<p>The vision makes reference to realising the economic, cultural and social potential of the district, providing opportunities for all. The latter paragraphs of the vision refer to the economies of the key settlements and the rural area.</p> <p>Strategic objective 4 contains a number of objectives relating to encouraging economic development, diversification and prosperity. This includes enabling existing businesses to remain within the district and expand, supporting tourism, improving skills and capitalising on innovation opportunities associated with Higher Education and supporting business of varying sizes. The strategic objective 4 specifically encourages knowledge based sectors to the area.</p> <p>Strategic objective 7 refers to reducing social inequalities but does not mention poverty, unemployment or incomes. However, elements of the vision and</p>	<p>Recommendations:</p> <p>The recommendation in relation to SA Objective 6 also applies to this objective.</p> <p>Strategic objective 4 should make reference to reducing income inequality in the district i.e. by providing space for employment growth in higher wage sectors rather than tourism which is traditionally a low wage sector.</p>	The Core Strategy focuses on providing the necessary space to help facilitate economic prosperity/ diversification – this might lead to income inequalities being addressed (but may not) given the attractiveness of Bath, rather than other parts of the District, to higher value sectors. Reference could only be included in strategic objective 3 if it were supported by a clear policy approach – currently evidence is not available to support this.

Vision and Objectives							
SA Objectives	Detailed questions: Does the policy ...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
					<p>objectives will provide job opportunities in better paid sectors (e.g. knowledge compared with tourism).</p> <p>The vision and objectives do not make reference to the reducing income inequality and due to the uneven opportunities within the district, it is considered that they could therefore be improved.</p>		
Objective 8: Enable local businesses to prosper	<p>Increase the circulation of wealth within the local authority area</p> <p>Reduce vulnerability of the economy to climate change and harness opportunities arising</p>	++	++	++	<p>The vision includes creating new jobs in ways which mitigate the causes of climate change, adapt to unavoidable climatic changes and help the district to move towards a low carbon economy. The latter paragraphs of the vision refer to the economies of the key settlements and the rural area.</p> <p>Strategic objective 4 contains a number of objectives relating to encouraging economic development, diversification and prosperity. This includes enabling existing businesses to remain within the district and expand, supporting tourism, providing more office space in Bath, improving skills and capitalising on innovation opportunities associated with Higher Education and supporting business of</p>		n/a

Vision and Objectives							
SA Objectives	Detailed questions: Does the policy ...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
					<p>varying sizes.</p> <p>Strategic objective 1 also supports the renewable energy sector.</p>		
Objective 9: Increase availability of local produce and materials	<p>Meet local needs locally</p> <p>Support local food producers</p>	+	+	+	<p>Strategic objective 1 supports the renewable energy sector in particular through community led schemes.</p> <p>Strategic objective 7 includes encouraging and facilitating increased local food production.</p> <p>The vision and objective make no other references to meeting needs for materials or produce locally and therefore could be improved.</p>	<p>Recommendations:</p> <p>The vision could be more specific in addressing this SA Objective by making reference within the first two paragraphs to meeting needs locally, especially with regards to materials and produce.</p> <p>A bullet point could be added to strategic objective 8 which encourages a reduction in distances travelled by meeting needs for materials and produce locally.</p>	Partially agree – reference included in Vision. Objective 8 is about improving connectivity and suggested addition does not sit well within it.
Objective 10: Ensure everyone has access to high	Make public transport, cycling and walking easier and	+	+	+	The vision makes reference to investment in transport infrastructure in Bath, the cycle network in Radstock and improving provision of public transport in the rural areas.	<p>Recommendation:</p> <p>Strategic objective 8 should refer to the provision of public transport that is</p>	The affordability of public transport is not an issue dealt with by the Core Strategy. It is addressed by the Joint Local Transport Plan (links between

Vision and Objectives							
SA Objectives	Detailed questions: Does the policy ...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
quality and affordable public transport and promote cycling and walking	more attractive				<p>Strategic objective 8 deals with reducing the need and desire to travel by car and encourages the use of public transport, walking and cycling. It also includes ensuring that development is supported by high quality transport infrastructure which helps to increase the attractiveness of public transport, walking and cycling.</p> <p>Neither the vision or strategic objectives refer to the affordability of public transport and therefore there is an opportunity for improvement.</p>	affordable.	the Core Strategy and JLTP are made in the objective).
Objective 11: Reduce the need and desire to travel by car	Reduce the need/desire to travel by car	++	++	++	<p>The vision makes reference to investment in transport infrastructure in Bath, the cycle network in Radstock and improving provision of public transport in the rural areas.</p> <p>Strategic objective 8 deals with reducing the need and desire to travel by car and encourages the use of public transport, walking and cycling. It also includes ensuring that development is supported by high quality transport infrastructure which helps to increase the attractiveness of public transport, walking and cycling.</p> <p>Strategic objective 1 also includes</p>		n/a

Vision and Objectives							
SA Objectives	Detailed questions: Does the policy ...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
					reducing the need to travel by achieving closer alignment of new homes, jobs, infrastructure and essential services.		
Objective 12: Protect and enhance local distinctiveness	Protect and enhance landscape and townscape Value and protect diversity and local distinctiveness including rural ways of life	++	++	++	The vision includes a number of references to maintaining the distinctiveness of places within the district, maintaining and enhancing the areas attractiveness and unique heritage and ensuring that the district is a successful place where urban and rural communities flourish. The 'stunning built and natural environment' is also mentioned. Strategic objective 3 covers protecting and enhancing the district's natural built and cultural heritage. The bullet points refer to distinctiveness and ensuring that new development takes place within the environmental capacity of the district.		n/a
Objective 13: Protect and enhance the district's historic, environmental and cultural	Maintain and enhance cultural and historical assets	++	++	++	The vision includes a number of references to protecting and enhancing the district's cultural and historic assets including maintaining and enhancing the area's attractiveness and unique heritage and making reference to the 'stunning built and natural environment'. Specific references are also made to the heritage of certain places within the vision including Bath, Radstock and Keynsham.		n/a

Vision and Objectives							
SA Objectives	Detailed questions: Does the policy ...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
assets					Strategic objective 3 covers protecting and enhancing the district's natural built and cultural heritage. The bullet points refer to helping to conserve and enhancing the character of built heritage, capitalising on the role of heritage in supporting place-making and regeneration, and ensuring that new development takes place within the environmental capacity of the district.		
Objective 14: Encourage and protect habitats and biodiversity . (taking account of climate change)	Protect and enhance habitats and species (taking account of climate change)	+	+	+	<p>The vision includes reference to protecting and enhancing the natural environment of the district.</p> <p>Strategic objective 2 relates to delivering green infrastructure which should have an indirect benefit to biodiversity by providing migration routes, which are particularly important in the face of a changing climate. This strategic objective also refers to conserving, enhancing, restoring the diversity and resilience of the district's wildlife sites but does not mention the biodiversity of the district as a whole.</p>	<p>Recommendation:</p> <p>The second bullet point under strategic objective 2 should be reworded to read: "helping to conserve, enhance and restore the diversity and resilience of species and habitats, especially the District's wildlife sites."</p>	Agree. The Submission Version of Core Strategy reflects this recommendation and now refers to species and habitats in the second bullet point.
Objective 15: Reduce land, water, air, light, noise	Minimise land, water, air, light, noise pollution	?	?	?	Pollution issues are not specifically mentioned within the vision and strategic objectives, however, they do refer to maintaining and improving the natural environment of the district.	<p>Mitigation:</p> <p>Strategic objective 1 should make reference to the need to avoid pollution relating to</p>	Agree – Submission Version of Core Strategy reflects this recommendation but reference is made under objective 2 (as more relevant than climate

Vision and Objectives							
SA Objectives	Detailed questions: Does the policy ...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
pollution					<p>Strategic objective 1 includes the prudent use and reduced consumption of natural resources such as soils and water but this does not directly relate to the protection of these resources from pollution.</p> <p>Strategic objectives 1 and 8 also includes objectives to reduce car use and the need and desire to travel which should help to reduce or maintain air pollution from transport. The vision also includes investment in transport infrastructure in Bath where there are several AQMA. Air quality in Keynsham is not mentioned.</p> <p>The performance of the vision and objectives is therefore uncertain because it is not clear that avoiding pollution can be inferred from the high level reference to environmental quality within the vision</p>	water, air, light and noise in relation to the protection of natural resources.	change related objective)
Objective 16: Encourage sustainable construction	Development that demonstrates sustainable design and construction	++	++	++	Strategic objective 1 includes promoting sustainable and energy efficient design and construction and facilitating the prudent use and reduced consumption of undeveloped land, energy, water and minerals. The vision also makes reference to mitigating the causes of climate change, adapting to unavoidable climatic		n/a

Vision and Objectives							
SA Objectives	Detailed questions: Does the policy ...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
	Minimise consumption and extraction of minerals				changes and moving towards a low carbon economy within the district. It is assumed that sustainable construction includes waste management.		
Objective 17: Ensure the development of sustainable and/or local energy sources and energy infrastructure	Reduce non-renewable energy consumption and 'greenhouse' emissions Promote sustainable energy generation and distribution	++	++	++	The vision makes reference to mitigating the causes of climate change, adapting to unavoidable climatic changes and moving towards a low carbon economy within the district and, specifically, local energy production within the southern part of the district. Strategic objective 1 includes encouraging and supporting the increased generation and use of renewable and low carbon energy, including through the delivery of community led schemes. It also includes promoting energy efficient design and reduced consumption of energy.		n/a
Objective 18: Reduce vulnerability to, and manage flood risk (taking account of	Reduce vulnerability to, and manage flood risk (taking account of climate change)	+	+	+	The vision makes reference to mitigating the causes of climate change and adapting to unavoidable climatic changes. Strategic objective 1 includes a bullet point relating to shaping places so as to minimise vulnerability and provide	Recommendation: Planning to protect people and property from the risk of flooding should be included within the vision.	Minor amendment made to strategic objective one to make reference to shaping places that minimise vulnerability to and are resilient to increased flood risk. This objective is also followed through in core policy framework and policy approach

Vision and Objectives							
SA Objectives	Detailed questions: Does the policy ...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
climate change)	Enable us to cope with hotter, drier summers (shade, ventilation, ground conditions etc)				resilience to impacts arising from climate change. As flooding is such a significant issue in parts of the district, particularly Bath, it is recommended that planning to protect people and property from the risk of flooding is included within the vision.		for Bath.
Objective 19: Encourage careful and efficient use of natural resources	Promote the conservation and wise use of land Keep water consumption within local carrying capacity limits (taking account of climate change) Minimise consumption and extraction of	++	++	++	Strategic objective 1 includes promoting sustainable and energy efficient design and construction and facilitating the prudent use and reduced consumption of undeveloped land, energy, water and minerals. Strategic objective 3 also includes optimising the use of brownfield land in meeting housing and economic development needs and ensuring that development and growth take place within the environmental capacity of the district.		n/a

Vision and Objectives							
SA Objectives	Detailed questions: Does the policy ...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
	minerals						
Objective 20: Promote waste management accordance with the waste hierarchy (Reduce, Reuse and Recycle)	Reduce waste not put to any use	-	-	-	<p>The vision and strategic objectives do not specifically refer to waste arisings or waste management.</p> <p>Strategic objective 1 includes promoting sustainable construction and it is assumed that waste management is included in sustainable construction.</p> <p>It is considered that waste management has been omitted from the vision and objectives.</p>	<p>Mitigation:</p> <p>Sustainable waste management, reducing waste arisings and the waste hierarchy should be referred to within strategic objective 1.</p>	Disagree – sustainable waste management, including reducing waste arising and the waste hierarchy is fully covered in the Joint Waste Core Strategy.

Overall Commentary:	<p>The vision and objectives generally perform well against the SA objectives. A number of potential significant positive effects have been identified in relation to the following SA Objectives:</p> <ul style="list-style-type: none"> • Objective 2: Improve the health and well-being of all communities; • Objective 3: Meet identified needs for sufficient, high quality and affordable housing; • Objective 5: Reduce anti-social behaviour, crime and the fear of crime; • Objective 8: Enable local businesses to prosper; • Objective 11: Reduce the need and desire to travel by car; • Objective 12: Protect and enhance local distinctiveness; • Objective 13: Protect and enhance the district’s historic, environmental and cultural assets; • Objective 16: Encourage sustainable construction;
----------------------------	---

- Objective 17: Ensure the development of sustainable and/or local energy sources and energy infrastructure; and
- Objective 19: Encourage careful and efficient use of natural resources

An uncertain performance was recorded with regards to 'Objective 15: Reduce land, water, air, light, noise pollution' because it is not clear that avoiding pollution can be inferred from the high level reference to environmental quality within the vision.

One potential minor negative effect has been identified as follows:

- Objective 20: Promote waste management accordance with the waste hierarchy (Reduce, Reuse and Recycle): It is considered that waste management has been omitted from the vision and objectives.

No potential cumulative negative or positive effects have been identified.

Mitigation is put forward to address the potential negative effects and the uncertain effect identified, as follows:

- Sustainable waste management, reducing waste arisings and the waste hierarchy should be referred to within strategic objective 1; and
- Strategic objective 1 should make reference to the need to avoid pollution relating to water, air, light and noise in relation to the protection of natural resources.

Recommendations have been put forward to improve the performance of the vision and objectives against the SA Objectives, as follows:

- The second bullet point under strategic objective 2 should be reworded to read: "helping to conserve, enhance and restore the diversity and resilience of species and habitats, especially the District's wildlife sites;
- The vision could be more specific in addressing this SA Objective by making reference within the first two paragraphs to people meeting their needs locally or having good access to community facilities and local services;
- The vision or objectives should make specific reference to achieving cohesive communities. This could be specifically in relation to new housing developments under strategic objective 6;
- The second to last paragraph of the vision and strategic objective 4 should include improving skills in Midsomer Norton and Radstock with reference to improving local job opportunities and supporting the local economy through attracting new employers;
- Strategic objective 4 should make reference to reducing income inequality in the district;
- The vision could be more specific in addressing this SA Objective by making reference within the first two paragraphs to

meeting needs locally, especially with regards to materials and produce;

- A bullet point could be added to strategic objective 8 which encourages a reduction in distances travelled by meeting needs for materials and produce locally;
- Strategic objective 8 should refer to the provision of public transport that is affordable; and
- Planning to protect people and property from the risk of flooding should be included within the vision.

Since the vision and objectives were appraised, amendments have been made in response to the mitigation and recommendations put forward. A residual minor negative effect remains with regards to SA Objective 20: Promote waste management accordance with the waste hierarchy (Reduce, Reuse and Recycle): It is considered that waste management has been omitted from the vision and objectives and a minor negative. Mitigation has been taken on board as suggested for SA Objective 15: Reduce land, water, air, light, noise pollution and the performance with regards to this objective is now minor positive in the short, medium and long terms.

Changes made in response to the recommendations have generally improved the performance of the vision and objectives with regards to the SA Objectives.

District Strategy

SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
Objective 1: Improve accessibility to community facilities and local services	<p>Help everyone access basic services easily, safely and affordably</p> <p>Increase access to and participation in community and cultural facilities and activities</p>	++	++	++	<p>The spatial strategy directs housing growth to existing settlements which contain services and facilities. Most new housing development will be in the main urban areas, which have the majority of higher order services and facilities, including access to public transport.</p> <p>The strategy for the Rural Areas will help increase access to local needs services and facilities through encouraging appropriate development to enable this.</p> <p>The strategy directs 800 new dwellings to the rural area and this development will be located at villages with a good range of local facilities and good public transport access. The spatial strategy will not directly address improving access to facilities and services in areas which experience barriers to accessing services and facilities identified in the baseline data.</p>		n/a
Objective 2: Improve the health and well-being of all communities	<p>Improve Health</p> <p>Reduce Health inequalities</p>	+	+	+	<p>The spatial strategy directs the majority of new housing and employment development to the main settlements which have healthcare facilities. By directing new development to existing main settlements, the strategy should encourage walking and cycling by locating new jobs and housing close to existing workforces, facilities and services. The strategy also makes reference to the need to encourage alternatives to car use.</p>		n/a

District Strategy

SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
	Promote healthy lifestyles, especially routine daily exercise				The spatial strategy may not help to reduce health inequalities but at the strategic level of this spatial strategy, it is difficult to see where there is an opportunity to address health inequalities. Other policies, such as the place-based policies, within the Core Strategy should help to address health inequalities, such as improving the quality of jobs and improving skills in the less affluent wards in the district.		
Objective 3: Meet identified needs for sufficient, high quality and affordable housing	Help make suitable housing available and affordable for everyone	+	+	+	<p>Affordability differs across the district.</p> <p>Development of the Spatial Strategy is explained in paras 1.17-1.24 which briefly sets out the context for the level of development proposed. A fuller explanation (with links to the relevant evidence) will be set out in a supporting Information Paper.</p> <p>Urban capacity studies in Bath have identified how much housing can be provided on brownfield land within the city and this has informed the housing growth number of 6,100 for Bath.</p> <p>Policy CP9 sets out the strategy for developing affordable housing for the district. This is underpinned by a Viability Study (see paras 6.71 – 6.72). As a lower amount of housing growth is proposed in this district strategy, compared with the previous housing growth options</p>		n/a

District Strategy

SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
					considered for the district strategy, less affordable housing could be delivered by this strategy compared to the previous options, however, this strategy is based on an evidence base predicting need and Policy CP9 aims to deliver a greater rate of affordable housing deliver than has been delivered in the district over previous years.		
Objective 4: Promote stronger more vibrant and cohesive communities	Promote stronger more cohesive communities	+	+	+	<p>It is assumed that the development proposed for the most sustainable villages will help support their vitality by supporting their facilities, such as schools, shops and pubs.</p> <p>By locating the majority of new housing and employment development close to the existing main settlements in the district, the spatial strategy should help to support strong, vibrant and cohesive communities. Development of the Spatial Strategy is explained in paras 1.17-1.24 which sets out the context for the level of development proposed. A fuller explanation (with links to the relevant evidence) will be set out in a supporting Information Paper.</p> <p>The apparent imbalance between housing and jobs results from the high level of residential commitments. The strategy for the Somer Valley seeks to ensure that any further residential development is only permitted if it brings economic benefits (employment development).</p>		n/a

District Strategy

SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
Objective 5: Reduce anti-social behaviour, crime and the fear of crime	Reduce crime and fear of crime	0	0	0	The spatial strategy itself will have a limited effect on crime and anti-social behaviour, however, the direction of growth to Keynsham and Bath may help to regenerate areas identified in the baseline as experiencing the highest levels of recorded priority crime. However, overall, a neutral performance is recorded for this spatial strategy against this SA Objective.	Recommendation The design core policy will need to ensure that designing out crime in new developments is a requirement of planning policy.	Policy CP6 seeks to achieve high quality and safe places. More detailed design guidance can be considered through the Placemaking DPD.
Objective 6: Improve the availability and provision of training	Give everyone access to learning, training, skills and knowledge	0	0	0	The spatial strategy does not deal specifically with the provision of training.	Recommendation The provision of training and improving skills should be dealt with in the place-based policies, where skills levels have been identified in certain places (i.e. Midsomer Norton and Radstock). The spatial strategy should refer to the need to improve skills in the Somer Valley area in order to deliver growth in the local economy in that area.	Policy DW1 refers to the need to ensure there is deliverable space to enable job growth in the Somer Valley area. This is expanded upon in Policy SV1. Para 4.13 identifies the need for improved education and training linking local businesses with key training providers. The Vision and Strategic Objectives have also been amended to refer to

District Strategy

SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
							improving skills in Midsomer Norton/Radstock.
Objective 7: Ensure communities have access to a wide range of employment opportunities, paid or unpaid	Give everyone in the region access to satisfying work opportunities, paid or unpaid Reduce poverty and income inequality Provide a diverse range of employment opportunities in a variety of	+/?	+/?	+/?	<p>The spatial strategy refers to improving the quality of jobs as well as delivering growth in jobs numbers, without the need for expansion of settlements. .</p> <p>The spatial strategy proposes the delivery of 7,500 new jobs based on a predicted increase in GVA of 1.6% up to 2026. This prediction is based on evidence provided within the B&NES Future Housing Growth Requirements to 2026: Stage 2 Report (Keith Woodhead, July 2010).</p> <p>The spatial strategy directs jobs growth to the main settlements within the district, including in the Somer Valley, plus 100 new jobs in the rural area. Para 1.25 (Summary Spatial Strategy for B&NES) seeks to locate new development in the most sustainable locations and addresses the issue of outcommuting. This provides the context for the more detailed explanation in the based placed sections. A fuller explanation (with links to the relevant evidence) will be set out in a supporting Information Paper.</p>	<p>Mitigation:</p> <p>The spatial strategy should refer to the need to improve skills in the Somer Valley area in order to deliver growth in the local economy in that area.</p>	<p>Policy DW1 refers to the need to ensure there is deliverable space to enable job growth in the Somer Valley area. This is expanded upon in Policy SV1. Para 4.13 identifies the need for improved education and training linking local businesses with key training providers.</p> <p>The Vision and Strategic Objectives have also been amended to refer to improving skills in Midsomer Norton/Radstock.</p>

Objective 8: Enable local businesses to prosper	Increase the circulation of wealth within the local authority area Reduce vulnerability of the economy to climate change and harness opportunities arising	++	++	++	The spatial strategy does not provide the detail of the types of employment growth to be encouraged / accommodated within each area identified on the Spatial Strategy Key Diagram. This level of detail will need to be provided within the area based policies. The strategy for economic development is addressed in each of the place based sections, which includes an emphasis on retaining local businesses where possible. Further clarification of the sectors of employment and therefore, types of space to be provided are also set out in the place based sections.		n/a
Objective 9: Increase availability of local produce and materials	Meet local needs locally Support local food producers				It is assumed that most local food producers are located within the rural area. The need to support local food production is particularly recognised in the Rural Areas Strategy (see paras 5.36 – 5.38) .The strategies for the other place based sections focus principally on sustaining those economies whilst ensuring local needs are provided for.		n/a

District Strategy

SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
Objective 10: Ensure everyone has access to high quality and affordable public transport and promote cycling and walking	Make public transport, cycling and walking easier and more attractive	+	+	+	<p>The spatial strategy is dependent on the Bath package and the Greater Bristol bus network coming forward. Most new housing development will be in the main urban areas, which have the majority of higher order services and facilities, including access to public transport. By directing new development to existing main settlements, the strategy should encourage walking and cycling by locating new jobs and housing close to existing workforces, facilities and services. The strategy also makes reference to the need to encourage alternatives to car use.</p> <p>The place based sections identify transport infrastructure improvements needed to support the strategy with an emphasis on sustainable means of transport.</p> <p>Policy SV1 sets out the proposed transport strategy for that area which should help address issues of congestion. The apparent imbalance between housing and jobs results from the high level of residential commitments. The strategy for the Somer Valley seeks to ensure that any further residential development is only permitted if it brings employment.</p>		n/a
Objective 11: Reduce the need and desire to travel by car	Reduce the need/desire to travel by car	+	+	+	<p>The spatial strategy is dependent on the Bath package and the Greater Bristol bus network coming forward. Objective 15: Reduce land, water, air, light, noise pollution	Minimise land, water, air, light, noise pollution	-/+	-/+	-/+	Although the growth proposed in Bath in the Spatial Strategy Key Diagram is dependent on the Bath package of transport measures, the growth proposed in Bath could exacerbate the existing poor air quality within much of the city. Similarly, growth in Keynsham could also exacerbate the air quality issue on the High Street.	<p>Mitigation:</p> <p>The Transport and Movement Core Policy needs to set out how the proposed development in the spatial strategy can be</p>	<p>Para 6.93 clarifies that AQMAs in B&NES will be managed in accordance with PPS1 and PPS23.</p> <p>The place based</p>

District Strategy

SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
					<p>However, by directing development into the existing areas, to brownfield sites, the spatial strategy will maximise opportunities for new residents to access work, education, facilities and service via walking, cycling and public transport.</p> <p>The direction of 2,700 new dwellings, but only 1,000 new jobs to the Somer Valley may increase commuting between here and Bath (and possibly also Bristol), although the Odd Down Park and Ride and the GreaterBristol bus network will help to mitigate increases in road traffic from entering Bath and exacerbating air quality issues.</p> <p>The avoidance of urban extensions within the district strategy should avoid the risk of introducing light and noise pollution into areas which previously did not suffer from this type of pollution.</p> <p>No water pollution issues are identified in relation to the district strategy.</p>	<p>accommodated without exacerbating air quality issues and reducing the effectiveness of AQMA action plans. The area-based policies will need to identify if any transport related infrastructure is needed in order to deliver the proposed growth in each area. The spatial strategy should provide more information on the reasoning behind the direction of new jobs to certain places and what it is hoped will be achieved (e.g. balance between jobs and homes, reducing commuting elsewhere for certain types of jobs).</p>	<p>sections identify transport infrastructure improvements needed to support the strategy with an emphasis on sustainable means of transport.</p> <p>Para 1.25 (Summary Spatial Strategy for B&NES) seeks to locate new development in the most sustainable locations and addresses the issue of outcommuting. This provides the context for the more detailed explanation in the based placed sections. A fuller explanation (with links to the relevant evidence) of the District-wide strategy</p>

District Strategy

SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
							will also be set out in a supporting Information Paper.
Objective 16: Encourage sustainable construction	Development that demonstrates sustainable design and construction Minimise consumption and extraction of minerals	0	0	0	The spatial strategy does not relate to the design of new development. The reuse of brownfield land that the spatial strategy prioritises may encourage the recycling of demolition materials, however, the overall performance of the spatial strategy against this SA Objective is considered to be neutral.	Recommendation: The Sustainable Construction Core Policy should encourage the reuse and recycling of demolition materials.	Policy CP2 requires applicants to demonstrate that waste and recycling during construction and in operation have been addressed as well as the type, lifecycle and source of materials to be used.
Objective 17: Ensure the development of sustainable and/or local energy sources and energy	Reduce non-renewable energy consumption and 'greenhouse'	?	?	?	The spatial strategy does not relate to renewable energy generation developments which are dealt with in the Renewable Energy Core Policy. However, the spatial strategy directs most new development in the direct to the existing urban areas, prioritising the redevelopment of brownfield land. The redevelopment of brownfield sites could potentially have less opportunities for decentralised renewable	Mitigation: The Core Strategy needs to address the how CO2 emissions targets will be achieved in this spatial strategy, particularly in Bath, where landscape and historic constraints	The reduction of CO2 emissions is addressed principally through Policies CP1 – CP4. Policy CP4, in particular, provides the context for area based solutions in respect of district

District Strategy

SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
infrastructure	emissions Promote sustainable energy generation and distribution				energy solutions / zero carbon design compared with large scale urban extensions. From 2016 all new dwellings will need to be zero carbon and townscape constraints may be a constraint on on-site energy generation in Bath. Therefore thought needs to be given to how CO2 emissions targets will be achieved in this spatial strategy, particularly in Bath, where townscape constraints exist.	exist. Ideally this should be addressed in the Spatial Strategy, with more detail provided within the area-based strategies, particularly in relation to the Bath Strategy.	heating. Reference is also in the place based policies (including Bath) to the opportunities for District-Heating and other energy reduction measures, including the retrofitting of historic buildings with micro-renewables and energy efficiency measures.
Objective 18: Reduce vulnerability to, and manage flood risk (taking account of climate change)	Reduce vulnerability to, and manage flood risk (taking account of climate change) Enable us to cope with hotter, drier	0	0	0	The spatial strategy directs housing growth to the existing main settlements in the district and prioritises brownfield land. Some brownfield land available for redevelopment, particularly in Bath, may be in areas at risk of flooding or could contribute to flooding through surface water runoff. Para 6.23 identifies surface water run off as a problem that needs to be addressed through Sustainable Drainage Systems. The proposed flooding policy will direct developers and others to the SFRA which in turn require the consideration of SUDS. Para 6.25 and the flood risk policy makes it clear that B&NES will follow a sequential approach to flood risk		n/a

District Strategy

SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
	summers (shade, ventilation, ground conditions etc)				management. These measure should help to offset and avoid flood risk issues and therefore the performance of the District Strategy is neutral.		
Objective 19: Encourage careful and efficient use of natural resources	Promote the conservation and wise use of land Keep water consumption within local carrying capacity limits (taking account of climate change) Minimise consumption and	+	+	+	The Spatial Strategy prioritises the redevelopment of brownfield land ahead of Greenfield land and avoids urban extensions, which supports the conservation and wise use of land. The growth proposed within the Spatial Strategy is likely to increase water demand and use of natural resources in construction. Policy CP2 expects applicants to demonstrate how water resources will be conserved and expects BREEAM excellent standards as a requirement by 2019 for non-residential development. Policy CP2 requires applicants to demonstrate that waste and recycling during construction and in operation have been addressed as well as the type, lifecycle and source of materials to be used.		n/a

District Strategy

SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
	extraction of minerals						
Objective 20: Promote waste management accordance with the waste hierarchy (Reduce, Reuse and Recycle)	Reduce waste not put to any use	0	0	0	The spatial strategy proposes a modest amount of growth in the district between 2006 and 2026 which would result in construction waste. Policy CP2 requires applicants to demonstrate that waste and recycling during construction and in operation have been addressed as well as the type, lifecycle and source of materials to be used and this should help to avoid increased waste arisings in the district. The performance of the District Strategy is therefore considered to be neutral.		n/a

Overall Commentary:

The Spatial Strategy has a mixed performance with regards to the SA Objectives.

A number of potential major positive effects have been identified in relation to the following SA Objectives:

- Objective 1: Improve accessibility to community facilities and local services;
- Objective 8: Enable local businesses to prosper;
- Objective 13: Protect and enhance the district's historic, environmental and cultural assets; and
- Objective 14: Encourage and protect habitats and biodiversity (taking account of climate change).

A potential major negative effect has been identified as follows:

- Objective 15: Reduce land, water, air, light, noise pollution: the growth proposed in Bath could exacerbate the existing poor air quality within much of the city. Similarly, growth in Keynsham could also exacerbate the air quality issue on the High Street.

Uncertain effects have been identified as follows:

- Objective 17: Ensure the development of sustainable and/or local energy sources and energy infrastructure: the redevelopment of brownfield sites could potentially have less opportunities for decentralised renewable energy solutions / zero carbon design compared with large scale urban extensions. From 2016 all new dwellings will need to be zero carbon and townscape constraints may be a constraint on on-site energy generation in Bath.

No potential cumulative effects have been identified.

Mitigation is put forward to address the potential negative effect and the uncertain effects identified, as follows:

- The spatial strategy should refer to the need to improve skills in the Somer Valley area in order to deliver growth in the local economy in that area;
- The Transport and Movement Core Policy needs to set out how the proposed development in the spatial strategy can be accommodated without exacerbating air quality issues and reducing the effectiveness of AQMA action plans. The area-based policies will need to identify if any transport related infrastructure is needed in order to deliver the proposed growth in each area;
- The spatial strategy should provide more information on the reasoning behind the direction of new jobs to certain places

and what it is hoped will be achieved (e.g. balance between jobs and homes, reducing commuting elsewhere for certain types of jobs); and

- The Core Strategy needs to address the how CO₂ emissions targets will be achieved in this spatial strategy, particularly in Bath, where landscape and historic constraints exist. Ideally this should be addressed in the Spatial Strategy, with more detail provided within the area-based strategies, particularly in relation to the Bath Strategy.

Recommendations have also been put forward to improve the performance of the spatial strategy are as follows:

- The design core policy will need to ensure that designing out crime in new developments is a requirement of planning policy;
- The provision of training and improving skills should be dealt with in the place-based policies, where skills levels have been identified in certain places (i.e. Midsomer Norton and Radstock);
- The spatial strategy should refer to the need to improve skills in the Somer Valley area in order to deliver growth in the local economy in that area;
- The district strategy makes allowance for Greenfield development and therefore suitable control of development will be required through the core policies and the development management policies within the forthcoming Place Making DPD; and
- The Sustainable Construction Core Policy should encourage the reuse and recycling of demolition materials.

Since the District Strategy was appraised, a number of changes have been made to the Core Strategy which have addressed the mitigation measures and some of the recommendations. As a result, the performance against 'SA Objective 7: Ensure communities have access to a wide range of employment opportunities, paid or unpaid' is now minor positive in the short, medium and long terms. As a result of mitigation put in place with regards to 'SA Objective 15: Reduce land, water, air, light, noise pollution', the performance against this SA objective is considered to have improved but a residual effect of minor negative and minor positive in the short, medium and long terms remains. As a result of the development of Core Policies relating to energy, the performance of the District Strategy with regards to 'SA Objective 17: Ensure the development of sustainable and/or local energy sources and energy infrastructure' is now minor positive in the short, medium and long terms.

The response from BANES officers to recommendations made in the appraisal will generally improve the performance of the policy in relation to the following SA Objectives:

- Objective 5: Reduce anti-social behaviour, crime and the fear of crime;

- Objective 6: Improve the availability and provision of training;
- Objective 13: Protect and enhance the district's historic, environmental and cultural assets; and
- Objective 16: Encourage sustainable construction.

Bath Strategy Matrix							
SA Objectives	Detailed questions: does the policy...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	Response from BANES
Objective 1: Improve accessibility to community facilities and local services	<p>Help everyone access basic services easily, safely and affordably</p> <p>Increase access to and participation in community and cultural facilities and activities</p>	+	+/-	+/-	<p>3,500 new dwellings will be constructed within the Bath Western Riverside area, with a further, 2,500 elsewhere in the city, 1,000 of these new dwellings on surplus MoD sites.</p> <p>The majority of new housing proposed for Bath is directed to the Central Area and Western Corridor. These areas are well placed to access the services facilities and open spaces of the city centre and its environs by walking, cycling and if necessary public transport.</p> <p>The Bath strategy identifies that there is significant potential for residential development on peripheral MoD sites at Foxhill and Ensleigh. These are less well located with regard to the city centre, local centres and other services/facilities. Paragraph 2.19 notes that, "The Placemaking DPD will consider the capacity and prospects for these sites in more detail, including measures to enable sustainable travel to the city centre and the impact of redevelopment on</p>	<p>Mitigation:</p> <p>The Bath Strategy (and/or accompanying Infrastructure Delivery Plan (IDP)) should identify that the redevelopment of the MoD Ensleigh and MoD Foxhill sites will need to be delivered with sustainable transport access to the city centre and local centres.</p> <p>Building on the identification of district/ local centres in the Core Strategy, the Placemaking DPD should set out more specific policies for enhancing specific local centres where a need / opportunity has been identified.</p> <p>The Bath Strategy (and/or accompanying IDP) should refer to the need to improve the network of health centres if a strategic deficiency has been identified.</p> <p>The Bath Strategy (and/or accompanying IDP) should refer to the need to improve various aspects of the green infrastructure</p>	<p>Reference made at para 2.19</p> <p>Agreed</p> <p>No strategic deficiency identified. No reference made.</p> <p>Reference made at para 2.24 and within IDP</p> <p>No strategic deficiency identified. Reference to key opportunity made at made at 2.25</p>

Bath Strategy Matrix

					<p>surrounding neighbourhoods”.</p> <p>However, it is considered that the Bath Strategy should identify the need to address sustainable transport access to the city centre and local centres. This is reflected in the significance score as a minor negative effect in the medium and long terms, as the MoD sites are not expected to become vacant in the short term.</p> <p>The Bath Strategy sets out challenges and risks including a lack of provision of some facilities and services, such as allotments and local shopping areas. Mention is made of the varying quality of these centres and scope for change. This will enable developments to contribute towards opportunities for improvement which have been identified.</p> <p>The Core Policies of the Core Strategy seek to ensure the provision of essential infrastructure including primary healthcare, primary</p>	<p>network if a strategic deficiency or opportunity has been identified. Allotments are currently mentioned.</p>	

Bath Strategy Matrix							
SA Objectives	Detailed questions: does the policy...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	Response from BANES
					and secondary education. No specific reference is made in the Bath strategy to these aspects aside from para 2.20 which considers the Royal United Hospital. The Core Policies also seek to protect, conserve and enhance the green infrastructure network.		
Objective 2: Improve the health and well-being of all communities	<p>Improve health</p> <p>Reduce health inequalities</p> <p>Promote healthy lifestyles, especially routine daily exercise</p>	+/-	+/-	+/-	<p>The Bath Strategy makes reference to the planned investment in the Royal United Hospital site at Combe Park and acknowledges that it is a major sub-regional healthcare facility. There is discussion relating to local centres but access to health clinics or centres is not mentioned and therefore this is recorded as an uncertain effect. The provision of health clinics or centres could be something that developers could be asked to contribute to.</p> <p>The Bath Strategy identifies allotment provision is lacking in several parts of the city, with a view to negotiating allotment provision with developers as and when opportunities arise. Allotments can contribute to healthy lifestyles.</p>	<p>Mitigation:</p> <p>The provision of health clinics or centres could be something that developers could be asked to contribute to. The Bath Strategy (and/or accompanying IDP) should refer to the need to improve the network of health centres if a strategic deficiency has been identified.</p> <p>The Bath Strategy should identify air quality as a key distinctive issue to be addressed as part of the delivery of development with regards to avoiding increasing air pollution. A Core Policy or Development Management Policy may be needed or should be saved from the existing LP – referring to PPS23.</p> <p>The Bath Strategy (and/or</p>	<p>No strategic deficiency identified. No reference made.</p> <p>Air quality now mentioned at key issue IX. Reference also made at 6.93 to air quality in Bath.</p> <p>Relevant references made throughout the Bath Chapter and supported by CP7 on GI.</p>

Bath Strategy Matrix							
SA Objectives	Detailed questions: does the policy...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	Response from BANES
					<p>The Bath Strategy also makes reference to leisure facilities, particularly those with opportunities for improvements. The Bath Strategy also makes reference to a new leisure centre in the city centre in connection with a new sports stadium.</p> <p>The majority of new housing proposed for Bath is directed to the river corridor and will be well placed to access the services facilities and open spaces of the city centre and its environs by walking and cycling.</p> <p>Although the growth proposed in Bath is dependent on the Bath Package of transport measures, the Bath Package was developed to address pre-Core Strategy issues. The extent which the Bath Package will improve air quality in the context of increased activity within the river corridor is uncertain and air quality could worsen.</p>	<p>accompanying IDP) should refer to the need to improve various aspects of the green infrastructure network if a strategic deficiency or opportunity has been identified. Allotments are currently mentioned.</p>	
Objective 3: Meet	Help make suitable	0	0	0	The Bath strategy refers to affordable housing as a key issue		n/a

Bath Strategy Matrix							
SA Objectives	Detailed questions: does the policy...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	Response from BANES
identified needs for sufficient, high quality and affordable housing	housing available and affordable for everyone				<p>under key issue (v).</p> <p>The District-wide Strategy and Affordable Housing Core Policy deal with affordable housing as it affects Bath. The Affordable Housing Core Policy allows for a higher proportion of affordable housing to be requested where the scheme market values are significantly above the district average. A neutral score is therefore awarded for the Bath Strategy chapter.</p> <p>The Bath Strategy enables the provision of over 3,000 new purpose-built student bed spaces at the University of Bath – Claverton Down and Bath Spa University – Newton Park in order to address the accommodation needs associated with growth at the University campuses. It is unlikely that the increased bed spaces will transfer more than a modest number of students from private rented accommodation to the campuses but it could halt the 'studentification' of specific areas within the city.</p>		

Bath Strategy Matrix							
SA Objectives	Detailed questions: does the policy...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	Response from BANES
Objective 4: Promote stronger more vibrant and cohesive communities	Promote stronger more cohesive communities	+	+	+	<p>The Bath Strategy includes the redevelopment of brownfield land, either that is underused at Bath Western Riverside or is expected to become vacant will become when the MoD move. The redevelopment of these sites should contribute to achieving stronger, vibrant and more cohesive communities within the parts of Bath where these sites are located.</p> <p>Economic and employment opportunities (SA Objective 6) will be important in addressing some of the cities more deprived areas. The strategy performs well in this regard.</p>		n/a
Objective 5: Reduce anti-social behaviour, crime and the fear of crime	Reduce crime and fear of crime	-	-	-	<p>The Bath Strategy does not address antisocial behaviour or other crime-related issues.</p> <p>As this has been identified as an issue in the Central Zone, the Bath Strategy should make reference to crime and antisocial behaviour, the need to ensure that new development designs out crime and the need to address anti-social behaviour within the central area.</p>	<p>Mitigation:</p> <p>The Bath Strategy should make reference to identified crime issues in the central zone. The Central Zone, the Bath Strategy should consider whether any locally specific planning policies could be adopted to address these issues. If not reference should be made in the relevant core policy to PPS1 and 'Safer Places – The Planning System and Crime Prevention'.</p>	Reference will not be made as no locally specific planning policies can be identified that would significantly address the issues. Reference made to PPS 1 and 'Safer Places' at 6.27 of High Quality design section of Core Policies section

SA Objectives	Detailed questions: does the policy...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	Response from BANES
climate change)					<p>heading 'Central Area and Western Corridor'.</p> <p>A Placemaking Principle included in the Central Area Strategic Policy is protecting the function of the river channel and riverbank as a key part of Bath's network of green infrastructure network and wildlife corridor and capitalise on its role as a linear recreational route, linking it into the city internally and to its environs.</p> <p>A Placemaking Principle within the Newbridge and Twerton Riversides Strategic Policy also refers to the wildlife quality and biodiversity role of this area.</p> <p>The Bath Strategy includes several measures to encourage more active use of the riverfront. Increasing use of the riverfront and development at the riverfront could potentially affect biodiversity through increased lighting, fragmentation of habitat and disturbance. However, the Environmental Quality Core Policy provides protection of designated sites of national and local biodiversity importance and habitat types and species of principal</p>	<p>infrastructure are mentioned a couple of times in the Bath Strategy the Bath Strategy would perform better against this SA Objective if there were some mention of biodiversity and green infrastructure within the Bath Vision and for the green infrastructure network of the city to be shown on the proposals map and/or the diagrams within the Bath Strategy.</p>	<p>'natural environment' which covers biodiversity and some aspects of GI. Reference to GI also implicit in references to boosting the city's profile as a place for recreation and leisure.</p> <p>All Green Infrastructure will be shown on the proposals map and key assets shown on the key diagram e.g. river Avon, canal and two tunnels cycle route.</p>

Bath Strategy Matrix							
SA Objectives	Detailed questions: does the policy...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	Response from BANES
					importance. The Environmental Quality Core Policy also seeks to improve biodiversity networks and reduce fragmentation of habitats.		
Objective 15: Reduce land, water, air, light, noise pollution	Minimise land, water, air, light, noise pollution	-	-	-	<p>Although the growth proposed in Bath is dependent on the Bath Package of transport measures, the Bath package was developed to address pre-Core Strategy issues. The extent which the Bath Package will improve air quality in the context of increased activity within the river corridor is uncertain and air quality could worsen.</p> <p>However, by directing development into the existing areas, to brownfield sites, the spatial strategy will maximise opportunities for new residents to access work, education, facilities and service via walking, cycling and public transport.</p> <p>The avoidance of urban extensions within the district strategy should avoid the risk of introducing light and noise pollution into areas which previously did not suffer from this type of pollution. However, the Bath Strategy does allow for some Greenfield development. Potential pollution associated with new</p>	<p>Mitigation:</p> <p>The Core Strategy (either in the Bath section or elsewhere) needs to set out how the proposed growth can be delivered without increasing air pollution (i.e. measures additional to (Bath Package) and how developers will be expected to contribute to achieving this goal.</p> <p>The Bath Strategy should make reference to not creating light pollution, particularly along the river.</p> <p>The Bath Strategy should make reference to the need to protect groundwater resources.</p>	<p>The key infrastructure and delivery matters section explains that:</p> <p>The Bath Package will help to enable the programme of development set out in the spatial strategy in conjunction with further measures to enable convenient and sustainable circulation and access within the city. In addition to major schemes the Council is committed to reducing the need to use cars for many trips within Bath. Therefore improvements to other public transport, walking and cycling infrastructure and the implementation of 'Smarter Choices' for transport will be pursued e.g. through the development of travel plans for new and existing sites, expansion of car clubs and other appropriate</p>

Bath Strategy Matrix							
SA Objectives	Detailed questions: does the policy...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	Response from BANES
					<p>development will need to be dealt with through development control policies.</p> <p>The Bath Strategy includes several measures to encourage more active use of the riverfront. Increasing use of the riverfront and development at the riverfront could potentially affect biodiversity through increased lighting. However, this should be controlled through the Environmental Quality Core Policy and other saved policies of the Local Plan.</p> <p>Development in Bath will need to ensure that groundwater resources are not adversely affected.</p>		<p>measures."</p> <p>Ground water resources and light pollution considered to be generic matter best dealt with in Environmental Quality section of Core Policy</p> <p>The submission version also introduced the following text as part of Policy B1 (10) "c: Implementing the Air Quality Management Plan." and "e: Addressing land remediation within the Central Area and Western Corridor in relation to industrial and utilities uses. The decommissioning and removal of the Windsor Gas Holder Station must be addressed as part of the redevelopment of Bath Western Riverside and its environs".</p>
Objective 16: Encourage sustainable construction	Development that demonstrates sustainable design and construction	0	0	0	The Bath Strategy text in relation to the Central Area and Western Corridor states that the forthcoming Place Making DPD will establish the potential use of individual sites and set out sustainable design principles. This statement should be made in	Recommendation: The Bath Strategy should state that the Place Making DPD will establish the potential use of individual sites and set out sustainable design principles, in relation to the whole of	Change now made to 2.12 to this effect.

SA Objectives	Detailed questions: does the policy...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	Response from BANES
e	and distribution				All new homes must be zero carbon from 2016. This challenging target may be difficult to achieve within Bath, where there are landscape/townscape constraints. However, this issue is dealt with, including with reference to Bath, in Core Policies CP1-CP4 and therefore a neutral performance is recorded.		
Objective 18: Reduce vulnerability to, and manage flood risk (taking account of climate change)	Reduce vulnerability to, and manage flood risk (taking account of climate change) Enable us to cope with hotter, drier summers (shade, ventilation, ground conditions etc)?	+	+	+	Some of the areas identified for redevelopment within Bath are located within areas at risk of flooding, however, the Key Infrastructure and Delivery matters section of the Bath Strategy sets out the proposed flood risk management solution for these areas. The Strategic Flood Risk Management Strategy prepared in response to the Strategic Flood Risk Management Assessment makes provision for the management of flood risk so that development proposed for areas categorized as 'in risk' can proceed safely and in accordance with PPS25.	Recommendations: The Strategy should make reference to the PPS 25 sequential test in relation to the sites identified for development. This policy or a separate flood risk policy needs to set out whether SUDS will be required on development sites within Bath.	The introduction to the Central Area and Western Corridor now refers to the PPS25 sequential test in relation to the sites identified for development. Issue of SUDs is devolved to flood risk management section of the core policies chapter at para 6.23 The submission version also introduced the following text as part of Policy B1 (10) "d: Implementing an upstream flood storage facility to enable development in vulnerable areas of the

Bath Strategy Matrix							
SA Objectives	Detailed questions: does the policy...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	Response from BANES
					The Key Infrastructure and Delivery matters section of the Bath Strategy does not identify whether SUDS will be required within new developments in the city, particularly those within Central Zone.		Central Area and Western Corridor”
Objective 19: Encourage careful and efficient use of natural resources	Promote the conservation and wise use of land Keep water consumption within local carrying capacity limits (taking account of climate change) Minimise consumption and extraction of minerals	?	?	?	The strategy seeks to optimize the use of the land resource within the city so that the vision can be achieved without incursions into the green belt. The Bath Strategy text in relation to the Central Area and Western Corridor states that the forthcoming Place Making DPD will establish the potential use of individual sites and set out sustainable design principles. This statement should be made in relation to the whole of the Bath Strategy and not just in relation to this part of the city because it makes it unclear whether sustainable design principles will also apply to development elsewhere in the city.	Mitigation: The Bath Strategy should state that the Place Making DPD will establish the potential use of individual sites and set out sustainable design principles, in relation to the whole of Bath. The Bath Strategy could also make reference to the Sustainable Construction and High Quality Design Core Policies.	Para 2.12 amended to clarify that the Placemaking Plan will establish development principles not only for the river Corridor but the whole of Bath’.
Objective 20: Promote waste management	Reduce waste not put to any use	0	0	0	The growth in Bath will produce construction waste, however, the redevelopment of brownfield sites proposes an opportunity to re-use		n/a

Bath Strategy Matrix							
SA Objectives	Detailed questions: does the policy...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	Response from BANES
t accordance with the waste hierarchy (Reduce, Reuse and Recycle)					<p>demolition waste on site.</p> <p>The Sustainable Construction Core Policy requires major developments to address waste and recycling during construction and in operation and therefore the performance of the Strategy in relation to this SA Objective is neutral.</p>		

Overall Commentary

The Bath Strategy has a mixed performance with regards to the SA Objectives. No potential cumulative effects have been identified.

Significant positive effects are identified with regards to the following SA Objectives:

- Objective 7: Ensure communities have access to a wide range of employment opportunities, paid or unpaid;
- Objective 12: Protect and enhance local distinctiveness; and
- Objective 13: Protect and enhance the district's historic, environmental and cultural assets.

Major negative effects are identified as follows:

- Objective 2: Improve the health and well-being of all communities and Objective 15: Reduce land, water, air, light, noise pollution: Although the growth proposed in Bath is dependent on the Bath Package of transport measures, the Bath package was developed to address pre-Core Strategy issues. The extent which the Bath Package will improve air quality in the context of increased activity within the river corridor is uncertain and air quality could worsen.

Minor negative effects are identified as follows (unless otherwise stated, effects are predicted over the short, medium and long term):

- Objective 1: Improve accessibility to community facilities and local services, Objective 10: Ensure everyone has access to high quality and affordable public transport and promote cycling and walking and Objective 11: Reduce the need and desire to travel by car (in the medium and long term): Residents of the redeveloped MoD Ensleigh and, to a lesser degree, MoD Foxhill sites might not have such good access to the city centre or local centres; and
- Objective 5: Reduce anti-social behaviour, crime and the fear of crime: The Bath Strategy does not address antisocial behaviour or other crime-related issues. Anti-social behavior has been identified as a problem in the city centre.

Uncertain effects are identified as follows:

- Objective 19: Encourage careful and efficient use of natural resources: It unclear whether sustainable design principles will also apply to development elsewhere in the city, apart from in the Central Area and Western Corridor.

Mitigation is put forward to address the negative and uncertain effects identified as follows:

- The Bath Strategy (and/or accompanying Infrastructure Delivery Plan (IDP)) should identify that the redevelopment of the MoD Ensleigh and MoD Foxhill sites will need to be delivered with sustainable transport access to the city centre and local centres.
- Building on the identification of district/ local centres in the Core Strategy, the Placemaking DPD should set out more specific policies

for enhancing specific local centres where a need / opportunity has been identified.

- The Bath Strategy (and/or accompanying IDP) should refer to the need to improve the network of health centres if a strategic deficiency has been identified.
- The Bath Strategy (and/or accompanying IDP) should refer to the need to improve various aspects of the green infrastructure network if a strategic deficiency or opportunity has been identified. Allotments are currently mentioned.
- The provision of health clinics or centres could be something that developers could be asked to contribute to. The Bath Strategy (and/or accompanying IDP) should refer to the need to improve the network of health centres if a strategic deficiency has been identified.
- The Bath Strategy should identify air quality as a key distinctive issue to be addressed as part of the delivery of development with regards to avoiding increasing air pollution. A Core Policy or Development Management Policy may be needed or should be saved from the existing LP – referring to PPS23.
- The Bath Strategy should make reference to identified crime issues in the central zone. The Central Zone, the Bath Strategy should consider whether any locally specific planning policies could be adopted to address these issues. If not reference should be made in the relevant core policy to PPS1 and 'Safer Places – The Planning System and Crime Prevention'.
- The Bath Strategy should make specific reference to increasing riverfront activity which is not detrimental to wildlife.
- The Core Strategy (either in the Bath section or elsewhere) needs to set out how the proposed growth can be delivered without increasing air pollution (i.e. measures additional to (Bath Package) and how developers will be expected to contribute to achieving this goal.
- The Bath Strategy should make reference to not creating light pollution, particularly along the river.
- The Bath Strategy should make reference to the need to protect groundwater resources.
- Bath Strategy should state that the Place Making DPD will establish the potential use of individual sites and set out sustainable design principles, in relation to the whole of Bath. The Bath Strategy could also make reference to the Sustainable Construction and High Quality Design Core Policies.

Recommendations are also made in order to improve the performance of the Bath Strategy:

- The Bath Strategy should consider whether it is likely to encourage green sectors to locate within the city and if there are any specific policies that are required.
- The Bath Strategy should state that the Place Making DPD will establish the potential use of individual sites and set out sustainable design principles, in relation to the whole of Bath.
- The Strategy should make reference to the PPS 25 sequential test in relation to the sites identified for development.
- This policy or a separate flood risk policy needs to set out whether SUDS will be required on development sites within Bath.

- Although wildlife and green infrastructure are mentioned a couple of times in the Bath Strategy the Bath Strategy would perform better against this SA Objective if there were some mention of biodiversity and green infrastructure within the Bath Vision and for the green infrastructure network of the city to be shown on the proposals map and/or the diagrams within the Bath Strategy.

Since the Bath Strategy was appraised, a number of changes have been made to the wording of the strategy in response to the mitigation measures and recommendations put forward. The residual effects of the Strategy with regard to the SA objectives is as follows (over the short, medium and long term):

- Objective 1: Improve accessibility to community facilities and local services: minor positive;
- Objective 2: Improve the health and well-being of all communities: minor positive;
- Objective 5: Reduce anti-social behaviour, crime and the fear of crime: neutral;
- Objective 10: Ensure everyone has access to high quality and affordable public transport and promote cycling and walking: minor positive;
- Objective 11: Reduce the need and desire to travel by car: minor positive;
- Objective 15: Reduce land, water, air, light, noise pollution: minor negative; and
- Objective 19: Encourage careful and efficient use of natural resources: minor positive.

Changes made in response to the recommendations have generally improved the Bath Strategy.

Keynsham Spatial Strategy Matrix

SA Objectives	Detailed questions: does the policy...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	BANES response:
Objective 1: Improve accessibility to community facilities and local services	Help everyone access basic services easily, safely and affordably Increase access to and participation in community and cultural facilities and activities	++	++	++	Policy KE1 sets out the Keynsham Spatial Strategy and includes enabling development which supports the functioning of the town and improves self containment. This policy also includes the retention of Queens Road and Chandag Road as local centres providing an important range of day-to-day essentials goods and services. Opportunities for enhancement of these local centres will be encouraged. This policy includes improvements to public transport and enhanced connectivity between walking and cycling routes. The potential for a central transport hub will be investigated. Policy KE1 does not mention the retention of community and cultural facilities and services within the town centre, such as the council offices and swimming pool, however, this is included in Policy KE2 and enhanced retail quality and enhanced public realm are shown on the High Street in Diagram 13.		n/a
Objective 2: Improve the health and well-being of all communities	Improve health Reduce health inequalities Promote healthy lifestyles, especially routine daily exercise	++	++	++	Policy KE1 includes enhanced connectivity between walking and cycling routes which will encourage healthy lifestyles. Policy KE2 includes retaining and enhancing the leisure and recreation function of the town centre and Somerdale as Placemaking Principles. Policy KE2 also encourages the establishment of an improved green infrastructure network for the town, which is also shown on Diagram 13.		n/a
Objective 3: Meet identified needs for	Help make suitable housing available and affordable for	+	+	+	The lack of affordable housing is acknowledged within this chapter of the CS. Policy KE1 includes the provision of high quality affordable housing in		n/a

Keynsham Spatial Strategy Matrix

SA Objectives	Detailed questions: does the policy...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	BANES response:
sufficient, high quality and affordable housing	everyone				the town. The split of market / affordable housing required in developments is set by the Housing Need Core Policy.		
Objective 4: Promote stronger more vibrant and cohesive communities	Promote stronger more cohesive communities	++	++	++	The overall strategy for Keynsham will help to improve self containment by providing more jobs in Keynsham, improving the image of the town as a business location and also through town centre improvements. Policy KE2 includes a Placemaking Principle to make the town centre a more vibrant area enabling all members of the community to enjoy it over a longer period of the day such as through the enhancement of the evening economy.		n/a
Objective 5: Reduce anti-social behaviour, crime and the fear of crime	Reduce crime and fear of crime	0	0	0	The spatial strategy for Keynsham does not address crime issues. However, the baseline data does not identify any specific issues and therefore a neutral performance is recorded.		n/a
Objective 6: Improve the availability and provision of training	Give everyone access to learning, training, skills and knowledge	0	0	0	The spatial strategy for Keynsham does not make reference to training or further education, however, primary school facilities and early years facilities are included within the Infrastructure required. The overall performance is considered to be neutral as primary level education provision does not address this SA Objective but no particular barrier to accessing training and skills has been identified within the baseline data.		n/a

Keynsham Spatial Strategy Matrix

SA Objectives	Detailed questions: does the policy...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	BANES response:
Objective 7: Ensure communities have access to a wide range of employment opportunities, paid or unpaid	<p>Give everyone in the region access to satisfying work opportunities, paid or unpaid</p> <p>Reduce poverty and income inequality</p> <p>Provide a diverse range of employment opportunities in a variety of sectors</p>	?	++	++	The performance of the spatial strategy is uncertain in the short term as it is unknown whether employment developments will come forward within the short term. However the overall performance of the spatial strategy in the medium and long terms is major positive as Policy KE1 makes provision for around 1,500 new jobs by 2026. This should help to enable the town to recover from recent job losses and reduce the need for residents to travel elsewhere for employment.		n/a
Objective 8: Enable local businesses to prosper	<p>Increase the circulation of wealth within the local authority area</p> <p>Reduce vulnerability of the economy to climate change and harness opportunities arising</p>	++	++	++	Policy KE1 includes flexibility to react to market demand for commercial uses within the core business area at Ashmead Park and policy KE2 supports expansion of the night time economy and enabling some medium to large retail units to provide space for national retailers in order to support the successful existing independent retailers. It is difficult to see how the spatial strategy could further help the local economy to reduce any vulnerability to climate change.		n/a
Objective 9: Increase availability of local produce and materials	<p>Meet local needs locally</p> <p>Support local food producers</p>	++	++	++	Policy KE2 specifically makes reference to the creation of a new civic space where events such as the farmers market can be held as part of an enhanced public realm for the town centre. The overall spatial strategy aims to encourage residents to do more shopping locally rather than travel further afield, such as into Bristol. The strategy also supports existing and improved community facilities and services.		n/a

Keynsham Spatial Strategy Matrix

SA Objectives	Detailed questions: does the policy...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	BANES response:
Objective 10: Ensure everyone has access to high quality and affordable public transport and promote cycling and walking	Make public transport, cycling and walking easier and more attractive	++	++	++	Policy KE1 includes improvements to public transport and enhanced connectivity between walking and cycling routes. The potential for a central transport hub will be investigated. Policy KE2 also includes improving links between the town centre and the Somerdale site, providing links to cycle networks, capitalising on the presence of the train station as an essential and sustainable link to Bristol and Bath and improving the management of traffic in the town centre, which will make walking and cycling in the centre more attractive. Improvements to the frequency of train services to Bristol and Bath are included within the Infrastructure section of this chapter which is derived from the Infrastructure Delivery Plan.		n/a
Objective 11: Reduce the need and desire to travel by car	Reduce the need/desire to travel by car	++	++	++	The overall spatial strategy aims to achieve more self containment and enable residents to work in Keynsham rather than travel further afield for employment. The strategy also encourages residents to do more shopping locally rather than travel further afield, such as into Bristol. The strategy also supports existing and improved community facilities and services within the town, all of which will help to reduce the need to travel. Improvements to walking, cycling and public transport (mentioned above) will also help to reduce the need/desire to travel by car.		n/a
Objective 12: Protect and enhance local distinctiveness	Protect and enhance landscape and townscape Value and protect	++	++	++	Policy KE2 includes as a Placemaking Principle reinforcing and enhancing the historic character and qualities of the Conservation Area ensuring that the local character is strengthened by change	Recommendation: Policy KE2 should encourage the reuse of the buildings at the	Agree, but as the buildings are not listed or in a Conservation

	diversity and local distinctiveness including rural ways of life				and maintaining the linear pattern and grain of the High Street. Policy KE2 also includes taking advantage of any redevelopment proposals which could improve the unattractive Town Hall/Centre and Riverside buildings. Policy KE2 does not make reference to the reuse of buildings at the Somerdale site, some of which are valued local landmarks.	Somerdale site.	Area, consider that a flexible approach should be taken within the policy Policy KE2 amended: Consider the potential for converting and reusing some or all of the factory buildings at Somerdale.
Objective 13: Protect and enhance the district's historic, environmental and cultural assets	Maintain and enhance cultural and historical assets	+	+	+	Policy KE2 includes as a Placemaking Principle reinforcing and enhancing the historic character and qualities of the Conservation Area which will help to address the existing risk to the Conservation Areas. Policy KE2 does not make reference to the reuse of buildings at the Somerdale site, which are considered to have cultural and historic value.	Recommendation: Policy KE2 should encourage the reuse of buildings at the Somerdale site.	As above
Objective 14: Encourage and protect habitats and biodiversity. (taking	Protect and enhance habitats and species (taking account of climate change)	+	+	+	The spatial strategy diagrams and policies KE1 and KE2 include making better use of and enhancing the green infrastructure running through and surrounding the town. Enhancements should include increasing the connectivity of green networks and making them more accessible. Policy		n/a

Keynsham Spatial Strategy Matrix

SA Objectives	Detailed questions: does the policy...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	BANES response:
account of climate change)					KE2 includes the protection of the Rivers Chew and Avon as wildlife corridors. Enhancing Keynsham Hams as wetland habitats as a part of the one site works required as part of Somerdale developments is included under the Infrastructure section of this chapter (derived from the Infrastructure Delivery Plan). The spatial strategy and policies contained therein do not include measures to improve specific habitats or biodiversity. This is promoted by the Environmental Quality Core Policy.		
Objective 15: Reduce land, water, air, light, noise pollution	Minimise land, water, air, light, noise pollution	+	+	+	<p>Policy KE1 includes improvements to the management of traffic through the town centre and improvements to air quality as placemaking principles. The Infrastructure section of this chapter also states that work is ongoing to identify the most appropriate means of mitigating the negative impact of traffic.</p> <p>Policy KE2 includes the protection of the Chew and Avon riverside as wildlife corridors and part of the surrounding green infrastructure network.</p> <p>Light, land and noise pollution have not been identified as particular issues in Keynsham.</p>		n/a
Objective 16: Encourage sustainable construction	<p>Development that demonstrates sustainable design and construction</p> <p>Minimise consumption and extraction of minerals</p>	0	0	0	This is not specifically mentioned within this spatial strategy and is dealt with within the Sustainable Construction Core Policy.		n/a

Keynsham Spatial Strategy Matrix

SA Objectives	Detailed questions: does the policy...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	BANES response:
Objective 17: Ensure the development of sustainable and/or local energy sources and energy infrastructure	Reduce non-renewable energy consumption and 'greenhouse' emissions Promote sustainable energy generation and distribution	++	++	++	The spatial strategy includes a district heating system for the town, in Diagram 12 and in Policy KE1. Town centre district heating infrastructure is also included in the Infrastructure section of the chapter. Renewable energy targets and proposals and the retrofitting of renewables and energy efficiency measures to existing buildings are dealt with in the Core Policies.	Recommendation: It would be useful for the reader to understand how the district heating system would be delivered and which neighbourhoods it is intended to serve.	This will be outlined in the District Heating Study which will be published alongside the Core Strategy. It is considered inappropriate to include this amount of detail within the Core Strategy. No change
Objective 18: Reduce vulnerability to, and manage flood risk (taking account of climate change)	Reduce vulnerability to, and manage flood risk (taking account of climate change) Enable us to cope with hotter, drier summers (shade, ventilation, ground conditions etc)?	+	+	+	The northern part of the Somerdale site is subject to flood risk. Policy KE2 requires proposals at this site to adhere to the requirements of PPS25 regarding flood risk. The protection and linking together of the green infrastructure network in and around the town will help to protect and enhance its surface water attenuation functions.		n/a
Objective 19: Encourage careful and efficient use of natural resources	Promote the conservation and wise use of land Keep water consumption within local carrying	++	++	++	The spatial strategy for Keynsham directs the majority of new development to the town centre and the Somerdale site (which is mainly brownfield land) therefore making good use of land. Policy KE2 Town Centre/Somerdale Strategic Policy includes a Placemaking principle to retain and enhance the leisure and recreation function of the	Recommendation: Policy KE2 should encourage the reuse of the buildings at the Somerdale site.	Agree, see response to objective 12

SA Objectives	Detailed questions: does the policy...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	BANES response:
							<p>KE2 policy area to be able to viably contribute to the district heating network.</p> <p>No change to Keynsham chapter. District wide chapter will include key infrastructure requirements for the district.</p>

Overall Commentary:

This policy mainly has the potential to result in major or minor positive effects with regards to most of the SA Objectives. Major positive effects were identified in relation to the following SA Objectives (in the short, medium and long term unless otherwise stated):

- Objective 1: Improve accessibility to community facilities and local services;
- Objective 2: Improve the health and well-being of all communities;
- Objective 4: Promote stronger more vibrant and cohesive communities;
- Objective 7: Ensure communities have access to a wide range of employment opportunities, paid or unpaid (in the medium and long term);
- Objective 8: Enable local businesses to prosper;
- Objective 9: Increase availability of local produce and materials;
- Objective 10: Ensure everyone has access to high quality and affordable public transport and promote cycling and walking;
- Objective 11: Reduce the need and desire to travel by car;
- Objective 12: Protect and enhance local distinctiveness; and
- Objective 17: Ensure the development of sustainable and/or local energy sources and energy infrastructure.

Minor positive effects were identified in relation to the following SA Objectives:

- Objective 3: Meet identified needs for sufficient, high quality and affordable housing;
- Objective 13: Protect and enhance the district's historic, environmental and cultural assets;
- Objective 14: Encourage and protect habitats and biodiversity (taking account of climate change);
- Objective 15: Reduce land, water, air, light, noise pollution;
- Objective 18: Reduce vulnerability to, and manage flood risk (taking account of climate change); and
- Objective 19: Encourage careful and efficient use of natural resources.

One major negative effect has been identified in relation to waste arisings because the potential waste facility at Broadmead Lane is not included as key infrastructure for the Keynsham spatial strategy and Policy KE2 does not make reference to the reuse of the buildings at the Somerdale site. The demolition of the Cadbury factory at Somerdale could produce large amounts of demolition material which could potentially be sent to landfill.

Neutral performances were recorded for the other SA Objectives (3 in total).

Mitigation is put forward to address the major negative effect identified, as follows:

- Policy KE2 should encourage the reuse of buildings at the Somerdale site and should encourage the use of any demolition material on site in the redevelopment of the site; and
- The potential waste facility at Broadmead Lane could be used to provide heat as part of the district heating system and if appropriate, such a link between a district heating system and the proposed waste plant should be made clear within the supporting text.

A potential positive cumulative effect has been identified with regards to encouraging and protecting biodiversity through the protecting, linking up and enhancement of the green infrastructure network in and around Keynsham.

An additional recommendation is made to improve the Keynsham Spatial Strategy with regards to the SA Objectives, as follows:

- It would be useful for the reader to understand how the district heating system would be delivered and which neighbourhoods it is intended to serve.

Since the strategy was appraised, policy KE2 has been amended to include the text “Consider the potential for converting and reusing some or all of the factory buildings at Somerdale”. Demolition material is covered by Policy CP2, and the Broadmead Lane site itself is allocated within the West of England Waste Core Strategy. This will be added as a key infrastructure requirement in the District Wide chapter. This addresses one of the proposed mitigation measures. The other mitigation measure has not led to a change in policy wording, but policy authors have provided further information about the feasibility of the waste facility linking in to the proposed CHP. The residual effect with regards to SA Objective 20 is now considered to be minor positive in the short, medium and long terms. The additional recommendation has not led to a policy wording change because it is not considered to be an appropriate level of detail for the Core Strategy. This information will be provided within the District Heating Study.

SA Objectives	Detailed questions: does the policy...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
Objective 1: Improve accessibility to community facilities and local services	Help everyone access basic services easily, safely and affordably Increase access to and participation in community and cultural facilities and activities	++	++	++	The overall strategy for the Somer Valley includes improvements to public transport, cycling infrastructure and 'smarter choices for transport' in order to reduced private motorised transport and improve accessibility around Midsomer Norton and Radstock, between Midsomer Norton and Radstock and the surrounding villages and between the Somer Valley area and other major settlements (via the Greater Bristol Bus Network). Policy SV1 includes improving access to local heritage, woodlands and green spaces including the implementation of the Town Park in Midsomer Norton. Policy SV1 also includes improvements to the cycle networks within Midsomer Norton and Radstock and within the surround area. Policy SV1 includes protecting and enhancing the retail offers within the two towns and existing local centres, including the specialist shops in Radstock centre which support cultural activities such as arts and crafts.		n/a
Objective 2: Improve the health and well-being of all communities	Improve health Reduce health inequalities Promote healthy lifestyles, especially routine daily exercise	+	+	+	The over strategy for the Somer Valley and Policy SV1 will encourage walking and cycling and will improve access to woodlands and green spaces which will help to contribute to healthy lifestyles. None of the policies within this chapter support the provision of additional allotments although it is mentioned in relation to green infrastructure in the Infrastructure section of the chapter.	Recommendation: The strategy would be improved if Policy SV1 included a principle to increase allotment provision in Midsomer Norton and Radstock (where deficiencies have been identified).	SV1 has been amended to increase allotment provision where deficiencies have been identified.
Objective 3:	Help make	++	++	++	Policy SV1 will enable 2,700 new homes to be built in the		n/a

Somer Valley Matrix

SA Objectives	Detailed questions: does the policy...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
Meet identified needs for sufficient, high quality and affordable housing	suitable housing available and affordable for everyone				Somer Valley over the plan period, which will include affordable housing. This will provide more housing choices for the community.		
Objective 4: Promote stronger more vibrant and cohesive communities	Promote stronger more cohesive communities	++	++	++	<p>The overall strategy for the Somer Valley is focused on the development of economic and community facilities needed to increase self reliance and economic revitalization.</p> <p>Policy SV1 includes the implementation of the proposed Town park in Midsomer Norton which will form a valuable community facility for the town. Policy SV1 also includes enhancing the public realm in Midsomer Norton and Radstock. Policy SV1 states that any new housing in excess of the 2,200 existing commitments will need to contribute to the delivery of employment or contributes to the implementation of the Town Park, which is aimed at reducing the risk of Radstock and Midsomer Norton becoming dormitory towns dominated by housing and lacking in community facilities. Policy SV2 includes improving the pedestrian environment of Midsomer Norton and improving leisure offer in the town which should help to support the vibrancy of the town. Policy SV3 includes improving connectivity between the core shopping area in Radstock, and community amenity areas including the library and Victoria Hall.</p>		n/a

Somer Valley Matrix

SA Objectives	Detailed questions: does the policy...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
Objective 5: Reduce anti-social behaviour, crime and the fear of crime	Reduce crime and fear of crime	0	0	0	The overall strategy for the Somer Valley and the policies within the chapter do not deal with crime, however, crime has not been identified a particular issue within the Somer Valley and therefore it is considered that the performance against this SA Objective is neutral.		n/a
Objective 6: Improve the availability and provision of training	Give everyone access to learning, training, skills and knowledge	++	++	++	The overall strategy for the Somer valley aims at encouraging a more diverse economy in the area, providing an improved range of local employment opportunities to target workers with different skills to replace jobs lost in traditional manufacturing. This, supported by the high quality schools and further education offer in the Somer Valley, should help to improve the skills of residents and provide them with greater opportunities for training.		n/a
Objective 7: Ensure communities have access to a wide range of employment opportunities, paid or unpaid	Give everyone in the region access to satisfying work opportunities, paid or unpaid Reduce poverty and income inequality Provide a diverse range of employment opportunities in a variety of sectors	++	++	++	The overall strategy for the Somer Valley focuses on the provision of employment development in order to improve self-reliance and reduce the need for residents to travel to nearby larger settlements (i.e. Bath and Bristol) for employment. The strategy aims to encourage a more diverse economy in the area, proving an improved range of local employment opportunities to replace jobs lost in traditional manufacturing.		n/a

Somer Valley Matrix

SA Objectives	Detailed questions: does the policy...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
Objective 8: Enable local businesses to prosper	Increase the circulation of wealth within the local authority area Reduce vulnerability of the economy to climate change and harness opportunities arising	++	++	++	Policy SV1 aims to ensure a supply of employment land to enable economic growth and retention of local companies, as well as encouraging and supporting new businesses in the area. Policy SV1 also encourages increased self reliance on local energy generation and low carbon living.		n/a
Objective 9: Increase availability of local produce and materials	Meet local needs locally Support local food producers	++	++	++	The overall strategy for the Somer Valley focuses on the provision of employment and community facilities in order to improve self-reliance and reduce the need for residents to travel to nearby larger settlements (i.e. Bath and Bristol) for employment, facilities and services. Policy SV1 also encourages local energy production and 'low carbon living locally'. Policies SV2 and SV3 also support local retailers in the two town centres. Local food producers are not specifically mentioned within the policies or strategy but farmers markets and the Radstock Co-op are already well established within Midsomer Norton and Radstock and economic development within area may enable the development of local food processing facilities, if suitable proposals are brought forward.		n/a
Objective 10: Ensure everyone has	Make public transport, cycling and walking	+	+	+	The overall strategy for the Somer Valley includes improvements to public transport, cycling infrastructure and 'smarter choices for transport' in order to reduced		n/a

							DPD.
Objective 15: Reduce land, water, air, light, noise pollution	Minimise land, water, air, light, noise pollution	+	+	+	Measures set out within the overall strategy for the Somer Valley and in Policy SV1 aim to improve more sustainable transport options such as walking, cycling and public transport and reduce the need to travel elsewhere by providing more jobs and community facilities. These measures should help to improve air quality and traffic noise, although they have not been identified as particular issues in the Somer Valley. Policy SV1 promotes the development of previously developed land focusing on Midsomer Norton and Radstock centres and the redevelopment of vacant and underused industrial land and factories. Light and water pollution are issues which will be dealt with through development control policies and no particular issues are identified with regard to the Somer Valley chapter.		n/a
Objective 16: Encourage sustainable construction	Development that demonstrates sustainable design and construction Minimise consumption and extraction of minerals	0	0	0	Sustainable construction is dealt with by the Sustainable Construction Core Policy for the whole district. Policy SV1 supports local, renewable and low carbon energy production, however, the overall performance of this strategy and the policies therein is considered to be neutral.		n/a
Objective 17: Ensure the development of	Reduce non-renewable energy consumption and	+	+	+	Policy SV1 includes the facilitation of increased self reliance including energy conservation and local energy generation and encourages initiatives to promote low		n/a

Somer Valley Matrix

SA Objectives	Detailed questions: does the policy...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
sustainable and/or local energy sources and energy infrastructure	'greenhouse' emissions Promote sustainable energy generation and distribution				carbon living including reducing energy use and securing more renewable and low carbon energy. It also encourages carrying out neighbourhood scale retrofitting for energy efficiency in homes and district heating systems in the centers of Midsomer Norton and Radstock.		
Objective 18: Reduce vulnerability to, and manage flood risk (taking account of climate change)	Reduce vulnerability to, and manage flood risk (taking account of climate change) Enable us to cope with hotter, drier summers (shade, ventilation, ground conditions etc)?	+	+	+	Part of Radstock Town Centre lies within Flood Zone 2 and 3a. Policy SV3 requires a sequential approach to flood risk management to be applied and development proposals should take into account the potential impact of climate change on water resources, water quality and on the level of flood risk posed.		n/a
Objective 19: Encourage careful and efficient use of natural resources	Promote the conservation and wise use of land Keep water consumption within local carrying capacity limits (taking account of climate change)	+	+	+	Policy SV1 promotes the development of previously developed land focusing on Midsomer Norton and Radstock centers and the redevelopment of vacant and underused industrial land and factories. Sustainable design is dealt with in the Sustainable Construction Core Policy.	Recommendation: The performance of the strategy would be improved if it encouraged the reuse of existing buildings where possible.	No change. Core Policy on Retro fitting will apply to this area.

Somer Valley Matrix

SA Objectives	Detailed questions: does the policy...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
	Minimise consumption and extraction of minerals						
Objective 20: Promote waste management in accordance with the waste hierarchy (Reduce, Reuse and Recycle)	Reduce waste not put to any use	0	0	0	Waste recycling levels in BANES are generally high. Sustainable construction issues are dealt with in the Sustainable Construction Core Policy. The performance of the strategy for the Somer Valley is therefore considered to be neutral, although there is an opportunity to improve the strategy (see recommendation).	Recommendation: as a key theme of the strategy for the Somer Valley is self-reliance there is an opportunity to improve the strategy for the Somer Valley by encouraging the management of waste arisings locally, such as through encouraging community composting. However, it is recognized that waste management for the district is dealt with by the West of England Waste Core Strategy and therefore the Core Strategy has little influence over how waste is managed within the area.	Comments noted. The principle of waste management is established through the Joint Waste Core Strategy DPD.

Overall Commentary:

The Strategy for the Somer Valley chapter and the three policies contained therein generally have a positive effect with regards to the SA Objectives. Major positive effects were identified with regard to the following SA objectives:

- Objective 1: Improve accessibility to community facilities and local services;
- Objective 3: Meet identified needs for sufficient, high quality and affordable housing;
- Objective 4: Promote stronger more vibrant and cohesive communities;
- Objective 6: Improve the availability and provision of training;
- Objective 7: Ensure communities have access to a wide range of employment opportunities, paid or unpaid;
- Objective 8: Enable local businesses to prosper;
- Objective 9: Increase availability of local produce and materials;
- Objective 10: Ensure everyone has access to high quality and affordable public transport and promote cycling and walking;
- Objective 11: Reduce the need and desire to travel by car;
- Objective 12: Protect and enhance local distinctiveness;
- Objective 13: Protect and enhance the district's historic, environmental and cultural assets;
- Objective 17: Ensure the development of sustainable and/or local energy sources and energy infrastructure; and
- Objective 18: Reduce vulnerability to, and manage flood risk (taking account of climate change).

Minor positive effects are identified in relation to the following SA Objectives:

- Objective 2: Improve the health and well-being of all communities;
- Objective 14: Encourage and protect habitats and biodiversity (taking account of climate change);
- Objective 15: Reduce land, water, air, light, noise pollution; and
- Objective 19: Encourage careful and efficient use of natural resources.

A neutral performance is recorded in relation to:

- Objective 5: Reduce anti-social behaviour, crime and the fear of crime;
- Objective 16: Encourage sustainable construction; and
- Objective 20: Promote waste management in accordance with the waste hierarchy (Reduce, Reuse and Recycle).

No potential cumulative effects have been identified.

A number of recommendations are also made to improve the performance of the Somer Valley strategy and policies. The recommendations are as follows:

- The strategy would be improved if Policy CV1 included a principle to increase allotment provision in Midsomer Norton and Radstock (where deficiencies have been identified).
- The policies could be improved if improvements to biodiversity were specifically targeted or new nature reserves were to be created through the placemaking principles.
- The performance of the strategy would be improved if it encouraged the reuse of existing buildings where possible.
- As a key theme of the strategy for the Somer Valley is self-reliance there is an opportunity to improve the strategy for the Somer Valley by encouraging the management of waste arisings locally, such as through encouraging community composting. However, it is recognized that waste management for the district is dealt with by the West of England Waste Core Strategy and therefore the Core Strategy has little influence over how waste is managed within the area.

Since the strategy was appraised, Policy SV1 has been amended to increase allotment provision where deficiencies have been identified. This is in response to the first recommendation listed above. This has improved the performance of the policy with regards to SA Objective 2. No other changes have been made to the Strategy although policy authors have identified core policies which deal with some of the issues identified with regards to the recommendations.

Rural Delivery Strategy							
SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
Objective 1: Improve accessibility to community facilities and local services	<p>Help everyone access basic services easily, safely and affordably</p> <p>Increase access to and participation in community and cultural facilities and activities</p>	+ / -	+ / -	+ / -	<p>The rural delivery strategy aims to maintain current levels of access to services and facilities in villages, including through a presumption for retention of village grocery shops and support for new community facilities and shops through partnership working. Policy RA3 Community Facilities and Shops supports proposals for development of community facilities or shops provided they are small scale and appropriate to meeting the needs of the parish.</p> <p>New housing development in the rural areas will be directed to the 'appropriate villages' which meet the criteria set out in Policy RA1 'appropriate development in the villages meeting the listed criteria'.</p> <p>Policy RA4 Rural Exception Sites also requires exception sites to be well related to community services and facilities.</p> <p>It is considered that the overall effect of the rural delivery strategy in terms of improving access to community facilities and local services will be mixed as the strategy policy will not result in significant improvements in access due to existing barriers and the nature of the rural area.</p>		n/a
Objective 2: Improve the health and	<p>Improve Health</p> <p>Reduce</p>	+ / -	+ / -	+ / -	<p>The rural delivery strategy gives support to the community facilities in villages where they already exist, which should help to maintain community</p>	<p>Mitigation: This negative effect should be mitigated by the Infrastructure</p>	<p>Agree - no action required.</p>

Rural Delivery Strategy							
SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
well-being of all communities	Health inequalities Promote healthy lifestyles, especially routine daily exercise				<p>cohesion and minimise social exclusion for members of the community, particularly the elderly and those reliant on public transport. This should help to support the health and well-being of some communities. However, the overall rural delivery strategy is for restricted growth in the rural areas, with some growth targeted at specific villages which meet the criteria set out in the Policy RA1 'appropriate development in the villages meeting the listed criteria'. Some housing, employment and community facilities development may be permitted through the 'exceptions policy', but even so, the rural delivery strategy does little to support the health and wellbeing of communities which do not meet the criteria set out in the Policy RA1 'appropriate development in the villages meeting the listed criteria'.</p> <p>A mixed performance is therefore recorded.</p>	Provision Core Policy which requires new development to be supported by the timely delivery of the required infrastructure to provide balanced and more self contained communities. The supporting text of the Infrastructure Provision Core Policy states that 'infrastructure' includes physical, social and green infrastructure. No action is therefore required.	
Objective 3: Meet identified needs for sufficient, high quality and affordable housing	Help make suitable housing available and affordable for everyone	+	+	+	The strategy includes a rural exceptions Policy which will permit 100% affordable housing in exception to other policies in the Core Strategy as long as there is demonstrated local need, the housing remains affordable in perpetuity, and the development is in scale and keeping with the form and character of its location. The policy also states that a small amount of market housing may be permitted if it is required to cross-subsidise		n/a

Rural Delivery Strategy							
SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
Recycle)							

Overall Commentary:

The rural delivery strategy generally has a mixed or neutral performance with regards to the SA Objectives. With regards to a number of the SA objectives, the strategy has the potential to have both a minor positive and a minor negative performance. This is because the rural delivery strategy aims to maintain current levels of access to services and facilities in villages, including through a presumption for retention of village grocery shops and support for new community facilities and shops.

New housing development in the rural areas will be directed to the 'appropriate villages' which meet the criteria set out in Policy RA1 'appropriate development in the villages meeting the listed criteria' which includes consideration of the number of facilities in the village and access to public transport. However, this does not address barriers to access to services and facilities experienced by other villages and therefore negative effects have also been recorded. The ability for the rural delivery strategy to address all barriers to access to services and facilities experienced by other villages is limited. Such mixed performances have been recorded with regards to the following SA Objectives:

- Objective 1: Improve accessibility to community facilities and local services;
- Objective 2: Improve the health and well-being of all communities;
- Objective 4: Promote stronger more *vibrant and cohesive* communities;
- Objective 9: Increase availability of local produce and materials;
- Objective 10: Ensure everyone has access to high quality and affordable public transport and promote cycling and walking; and
- Objective 11: Reduce the need and desire to travel by car.

The performance of the rural delivery strategy with regards to a number of the SA Objectives was minor positive but with some uncertainty, because the scale of development proposed in the rural areas is not significant, however, it could involve the development of Greenfield land and therefore some uncertainty exists with regards to potential effects relating to landscape and visual, ecology and biodiversity and archaeology. This relates to the following SA Objectives:

- Objective 12: Protect and enhance local distinctiveness;
- Objective 13: Protect and enhance the district's historic, environmental and cultural assets; and
- Objective 14: Encourage and protect habitats and biodiversity (taking account of climate change).

Uncertain effects were identified in relation to Objective 18: Reduce vulnerability to, and manage flood risk (taking account of climate change).

A potential negative cumulative effect has been identified in relation to housing development putting pressure on existing facilities, such as schools, public transport, and Park and Ride facilities. This effect should be mitigated by the Infrastructure Provision Core Policy which requires new development to be supported by the timely delivery of the required infrastructure to provide balanced and more self contained communities. The supporting text of the Infrastructure Provision Core Policy states that 'infrastructure' includes physical, social and green infrastructure. However, policy wording is needed to ensure that housing developments consider the potential for cumulative effects with regard to social infrastructure / community facilities.

Mitigation is put forward to address the potential negative effects and the uncertain effects identified, as follows:

- Landscape and visual assessment should be undertaken prior to any Greenfield development. This should be a requirement of development management policy in the forthcoming Place Making DPD.
- Archaeological assessment should be undertaken prior to any Greenfield development. This should be a requirement of development management policy in the forthcoming Place Making DPD;
- Ecological assessment should be undertaken prior to development of Greenfield sites. This should be a requirement of development management policy in the forthcoming Place Making DPD which should also require ecological assessment of brownfield sites;
- Policy wording is needed to ensure that applications for housing developments consider the potential for cumulative effects with regard to social infrastructure / community facilities; and
- The potential negative effects on SA Objectives 2 and 4 should be mitigated by the Infrastructure Provision Core Policy which requires new development to be supported by the timely delivery of the required infrastructure to provide balanced and more self contained communities. The supporting text of the Infrastructure Provision Core Policy states that 'infrastructure' includes physical, social and green infrastructure. No action is therefore required.

Since the Rural Strategy was appraised, the supporting text of the Infrastructure Provision Core Policy has been amended to refer to the need for potential cumulative effects to be considered which should offset the potential negative cumulative effect identified. No further changes were required but the responses from the policy authors have removed the uncertainty recorded in the appraisal with regards to SA objectives 12, 13 and 14.

Core Policies – Energy Hierarchy, CPI Retrofitting Existing Buildings, CP2 Sustainable Construction, CP3 Renewable Energy, CP4 District Heating							
SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
Objective 1: Improve accessibility to community facilities and local services	Help everyone access basic services easily, safely and affordably Increase access to and participation in community and cultural facilities and activities	N/A	N/A	N/A	Policies CP1-CP4 are not relevant to this SA Objective. Accessibility to services and facilities is dealt with in the area-based chapters, the Infrastructure Provision Core Policy (CP13) and the District Wide Spatial Strategy (DW1).		n/a
Objective 2: Improve the health and well-being of all communities	Improve Health Reduce Health inequalities Promote healthy lifestyles, especially routine daily exercise	+	+	+	Policy CP1 could help to reduce improve the insulation of existing homes which could reduce adverse health impacts of cold weather in winter and possibly overheating in summer. Policy CP1 should also help to address fuel poverty. Poor insulation and cold housing can also be linked to other health issues.		n/a

	in a variety of sectors						
Objective 8: Enable local businesses to prosper	Increase the circulation of wealth within the local authority area Reduce vulnerability of the economy to climate change and harness opportunities arising	++	++	++	Policies CP1 to CP4 support the growing renewable and low carbon energy sector and Policy CP1 encourages the use of skills in retrofitting energy efficiency measures and fitting micro-renewables to historic buildings which could help support local businesses in these sectors. These sectors respond to the opportunities arising from climate change.		n/a
Objective 9: Increase availability of local produce and materials	Meet local needs locally Support local food producers	+	+	+	Policies CP1, CP2, CP3 and CP4 all have the potential to support the use of local produce and materials relating to insulation products and renewable fuels such as wood.		n/a
Objective 10: Ensure everyone has access to	Make public transport, cycling and walking	N/A	N/A	N/A	Policies CP1-CP4 are not relevant to this SA Objective. The provision of new transport related infrastructure is dealt with in the Infrastructure Provision Core Policy		n/a

Core Policies – Energy Hierarchy, CPI Retrofitting Existing Buildings, CP2 Sustainable Construction, CP3 Renewable Energy, CP4 District Heating							
SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
high quality and affordable public transport and promote cycling and walking	easier and more attractive				(CP13) and the area-based strategies. Access to services and facilities by walking, cycling and public transport are dealt with in the area-based strategies and the District Wide Spatial Strategy (DW1).		
Objective 11: Reduce the need and desire to travel by car	Reduce the need/desire to travel by car	N/A	N/A	N/A	Policies CP1-CP4 are not relevant to this SA Objective. Reducing the need to travel by car is dealt with in the area-based strategies and the District Wide Spatial Strategy (DW1).		n/a
Objective 12: Protect and enhance local distinctiveness	Protect and enhance landscape and townscape Value and protect diversity and local distinctiveness including rural ways of life	++	++	++	Policy CP4 encourages the use of district heating schemes which in urban areas, can have a lower visual impact than other low and zero carbon energy generation options. Policy CP1 encourages the retrofitting of micro-renewables and energy efficiency measures into historic buildings whilst retaining the special characteristics of heritage assets. Policy CP3 encourages renewable energy proposals, including large scale free standing installations with consideration of environmental impact.		n/a

Core Policies – Energy Hierarchy, CPI Retrofitting Existing Buildings, CP2 Sustainable Construction, CP3 Renewable Energy, CP4 District Heating							
SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
Objective 13: Protect and enhance the district's historic, environmental and cultural assets	Maintain and enhance cultural and historical assets	--	--	--	Policy CP4 encourages the use of district heating schemes which in urban areas, can have a lower visual impact than other low and zero carbon energy generation options. Policy CP1 encourages the retrofitting of micro-renewables and energy efficiency measures into historic buildings whilst retaining the special characteristics of heritage assets. Policy CP3 encourages renewable energy proposals, including large scale free standing installations with consideration of environmental impact. However, a potential negative effect is identified because underground distribution systems associated with CHP could conflict with below ground archaeology, particularly in Bath.	Mitigation: The need to assess potential impacts on archaeology when considering feasibility of CHP should be highlighted within policy CP4 or within the supporting text.	Reference now included in supporting text – this has underpinned the research approach and so mitigation of these impacts and avoidance of areas of high risk has been taken.
Objective 14: Encourage and protect habitats and biodiversity. (taking account of climate change)	Protect and enhance habitats and species (taking account of climate change)	++	++	++	Policy CP3 encourages renewable energy proposals, including large scale free standing installations with consideration of environmental impact. Policy CP6 Environmental Policy (appraised separately) provides protection of habitats and species of principal importance which would therefore protect bat species which could be affected by wind turbines and		n/a

Core Policies – Energy Hierarchy, CPI Retrofitting Existing Buildings, CP2 Sustainable Construction, CP3 Renewable Energy, CP4 District Heating							
SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
					construction in the countryside.		
Objective 15: Reduce land, water, air, light, noise pollution	Minimise land, water, air, light, noise pollution	++	++	++	Policy CP3 encourages renewable energy proposals, including large scale free standing installations with consideration of environmental impact. This will need to include air quality, particularly in Bath where it is an existing problem and where biomass boilers could exacerbate this issue. Any construction related impacts would be controlled through development control policies. Policies CP1 to CP4 and the energy hierarchy policy will all help to reduce carbon emissions in the district.		n/a
Objective 16: Encourage sustainable construction	Development that demonstrates sustainable design and construction Minimise consumption and extraction of minerals	+	+	+	Policy CP2 requires new development to integrate sustainable design and construction and requires planning applications to be supported by a complete Sustainable Construction Checklist and provision of evidence in the Design and Access Statement. Criteria set out in the policy require waste, conserving water resources, the type, life cycle and source of materials to be addressed in developments.	Recommendation: the criteria set out in the policy could be clearer in promoting resource efficiency by inserting the word 'minimisation' after the word 'waste and inserting the words 'efficiency in materials use, including' in front of 'The type, life cycle....'	Suggested changes made.

accordance with the waste hierarchy (Reduce, Reuse and Recycle)					development to achieve BREEAM Excellent from 2019. The Code awards credits for providing space for recyclables to be stored and collected and for the provision of composting facilities. Policy CP2 also requires development proposals to provide information on waste and recycling during construction and operation.	demolition material.	general criteria.

Overall Commentary:

The energy hierarchy policy and policies CP1 to CP4 generally perform well against the SA Objectives. A number of potential significant positive effects have been identified in relation to the following SA Objectives:

- Objective 7: Ensure communities have access to a wide range of employment opportunities, paid or unpaid;
- Objective 8: Enable local businesses to prosper;
- Objective 12: Protect and enhance local distinctiveness;
- Objective 14: Encourage and protect habitats and biodiversity (taking account of climate change);
- Objective 15: Reduce land, water, air, light, noise pollution;
- Objective 17: Ensure the development of sustainable and/or local energy sources and energy infrastructure;
- Objective 18: Reduce vulnerability to, and manage flood risk (taking account of climate change); and
- Objective 19: Encourage careful and efficient use of natural resources.

Potential minor positive effects were identified in relation to the following SA Objectives:

- Objective 2: Improve the health and well-being of all communities;
- Objective 3: Meet identified needs for sufficient, high quality and affordable housing;
- Objective 5: Reduce anti-social behaviour, crime and the fear of crime;
- Objective 9: Increase availability of local produce and materials;
- Objective 16: Encourage sustainable construction; and
- Objective 20: Promote waste management accordance with the waste hierarchy.

One potential major negative effect was identified in relation to Objective 13: Protect and enhance the district's historic, environmental and cultural assets. The following mitigation measure is put forward to address the effect as follows:

- The need to assess potential impacts on archaeology when considering feasibility of CHP should be highlighted within policy CP4 or within the supporting text.

No uncertain effects have been identified.

A potential positive cumulative effect has been identified which is that the measures encourages through the energy hierarchy policy and policies CP1 to CP4 could result in an overall cumulative effect on reducing greenhouse gas emissions.

A number of recommendations have been put forward to improve the policy, as follows:

- Major developments in relation to policy CP2 should be defined or a reference provided to where major developments are defined if it is elsewhere in the Core Strategy.
- The criteria set out in policy CP2 could be clearer in promoting resource efficiency by inserting the word 'minimisation' after the word 'waste and inserting the words 'efficiency in materials use, including' in front of 'The type, life cycle....'
- Policy CP2 could specifically encourage the reuse and recycling of Bath stone and demolition material.

With regards to references to Code for sustainable homes assessments within policy CP2, the following amendments to policy wording are recommended:

- Reference to 'design stage assessments' should be changed to 'pre-assessments' and a recommendation should be included that pre-assessments are undertaken by an accredited assessor; and
- 'Post-construction' assessments should replace 'post occupancy' assessments.

The policies have since been amended in line with the mitigation and recommended enhancement measures put forward above. The changes made in response to the recommendations have improved the performance of the policies. The change made in response to the mitigation measure has offset the potential major negative effects with regards to SA Objective 13 and the performance will now be neutral over the short, medium and long terms.

Policy CP5 Flood Risk Management							
SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	BANES response
Objective 1: Improve accessibility to community facilities and local services	Help everyone access basic services easily, safely and affordably Increase access to and participation in community and cultural facilities and activities	0	0	0	This policy is unlikely to have a relationship with access to services and facilities.		n/a
Objective 2: Improve the health and well-being of all communities	Improve Health Reduce Health inequalities Promote healthy lifestyles, especially routine daily exercise	+	+	+	This policy requires any development in areas at risk of flooding to be safe throughout its lifetime, by incorporating mitigation measures either on or offsite, as appropriate. This policy also requires all developments to incorporate SuDS in order to reduce surface water runoff and minimise contribution to flood risks elsewhere.		n/a.
Objective 3: Meet identified needs for sufficient, high quality and affordable housing	Help make suitable housing available and affordable for everyone	0	0	0	This policy will not provide housing for the district however, the policy will ensure that housing is built in areas of lower flood risk. If housing is built in areas at risk from flooding this policy requires the development to be safe throughout it's lifetime by incorporating mitigation measures. Therefore a neutral performance is recorded.		n/a.
Objective 4: Promote stronger more vibrant and cohesive	Promote stronger more cohesive communities	+	+	+	By ensuring that new developments are not at risk from flooding and do not exacerbate flood risk elsewhere, this policy supports the achievement of this		n/a.

SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	BANES response
district's historic, environmental and cultural assets					new developments do not exacerbate any flood risk elsewhere.		
Objective 14: Encourage and protect habitats and biodiversity (taking account of climate change)	Protect and enhance habitats and species (taking account of climate change)	+	+	+	This policy does not mention the relationship between flooding and habitats and species, although as an indirect effect of the policy, it may well provide new habitats through the provision of SuDS. Policy CP7 Green Infrastructure supports the protection, expansion and enhancement of the green infrastructure network across the district. The policy promotes a multi-functional green infrastructure network which could include SuDS.	Recommendation: this policy could promote SuDs which provide wildlife habitats as well as surface water management, where appropriate.	Additional explanatory text included.
Objective 15: Reduce land, water, air, light, noise pollution	Minimise land, water, air, light, noise pollution	0	0	0	This policy is not likely to have an effect on pollution levels.		n/a.
Objective 16: Encourage sustainable construction	Development that demonstrates sustainable design and construction Minimise consumption and extraction of minerals	+	+	+	This policy supports this SA Objective by ensuring that developments are sustainable with regards to flood risk and surface water management. This policy also requires developments to be safe throughout their lifetime.		n/a.
Objective 17: Ensure the	Reduce non-renewable energy consumption and	0	0	0	This policy is not likely to have an effect		n/a.

Policy CP5 Flood Risk Management							
SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	BANES response
development of sustainable and/or local energy sources and energy infrastructure	'greenhouse' emissions Promote sustainable energy generation and distribution				on generation of energy.		
Objective 18: Reduce vulnerability to, and manage flood risk (taking account of climate change)	Reduce vulnerability to, and manage flood risk (taking account of climate change) Enable us to cope with hotter, drier summers (shade, ventilation, ground conditions etc)	++	++	++	This policy requires development in the district to follow a sequential approach to flood risk management, giving priority to the development of sites with the lowest risk of flooding and taking into account the vulnerability of the development. The policy requires development to be safe throughout its lifetime through on-site flood defence work and/or contribution towards offsite measures as necessary. All developments are expected to incorporate SuDS, which will be approved, adopted and maintained by BANES as the SuDS Approving Body. SuDs could help us to cope with hotter, drier summers through the provision of standing water.		n/a.
Objective 19: Encourage careful and efficient use of natural resources	Promote the conservation and wise use of land Keep water consumption within local carrying capacity limits (taking	+	+	+	This policy promote the use of SuDs in new developments which support the infiltration of water into soils and rocks, where appropriate ground conditions occur. This supports the conservation of water resources. This policy is unlikely		n/a.

Policy CP5 Flood Risk Management							
SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	BANES response
	account of climate change) Minimise consumption and extraction of minerals				to affect consumption of resources.		
Objective 20: Promote waste management accordance with the waste hierarchy (Reduce, Reuse and Recycle)	Reduce waste not put to any use	0	0	0	This policy is not likely to affect waste management or waste arisings.		n/a.

Overall Commentary:

This Flood Risk Policy is not relevant to a number of SA Objectives, but where it is relevant, the policy generally performs well. No potential negative or uncertain effects have been identified.

A potential major positive effect has been identified in relation to Objective 18: Reduce vulnerability to, and manage flood risk (taking account of climate change).

Potential minor positive effects have been identified in relation to the following SA Objectives:

- Objective 2: Improve the health and well-being of all communities;
- Objective 4: Promote stronger more vibrant and cohesive communities;
- Objective 13: Protect and enhance the district's historic, environmental and cultural assets;
- Objective 14: Encourage and protect habitats and biodiversity (taking account of climate change);
- Objective 16: Encourage sustainable construction; and
- Objective 19: Encourage careful and efficient use of natural resources.

No potential cumulative effects have been identified.

A recommendation has been put forward to improve the performance of the policy as follows:

- This policy could promote SuDs which provide wildlife habitats as well as surface water management, where appropriate.

Since the policy was appraised, the policy has been improved through the addition of explanatory text in response to the recommendation made in the appraisal.

Policy CP6 Environmental Quality							
SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
Objective 1: Improve accessibility to community facilities and local services	Help everyone access basic services easily, safely and affordably Increase access to and participation in community and cultural facilities and activities	0	0	0	Policy CP6 supports sustainable opportunities for improved access to nature conservation, landscape and heritage assets which could potentially increase participation in community and cultural activities, however, overall it is considered that the performance against this SA Objective is neutral.		n/a
Objective 2: Improve the health and well-being of all communities	Improve Health Reduce Health inequalities Promote healthy lifestyles, especially routine daily exercise	+	+	+	Policy CP6 supports the achievement of this SA Objective through protecting and enhancing the environments in which residents work and spend leisure time and the policy supports sustainable opportunities for improved access to nature conservation, landscape and heritage assets. These factors should help to improve the well being.		n/a
Objective 3: Meet identified	Help make suitable housing	N/A	N/A	N/A	This policy is not relevant to this SA Objective. The provision of housing is dealt with in policies CP9 and CP10.		n/a

Policy CP6 Environmental Quality							
SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
needs for sufficient, high quality and affordable housing	available and affordable for everyone						
Objective 4: Promote stronger more vibrant and cohesive communities	Promote stronger more cohesive communities	+	+	+	The High Quality Design part of Policy CP6 aims to implement high quality and inclusive design which reinforces and contributes to the built environment and creates attractive, inspiring and safe places. The policy also requires housing schemes to meet the Building for Life 'good' standard which means that developments will meet 14-15.5 of the 20 Building for Life criteria. The criteria include access to community facilities and whether the housing provided in the development meets the needs and aspirations of the community.		n/a
Objective 5: Reduce anti-social behaviour, crime and the fear of crime	Reduce crime and fear of crime	+	+	+	The High Quality Design part of Policy CP6 aims to implement high quality and inclusive design which creates safe places.	Recommendation: Policy CP6 would perform better if housing schemes were also required to comply with the principles of Secured by Design.	Policy CP6 is a high level strategic policy and applies to all design issues not specifically housing. Clause 1 seeks to implement high quality and safe places. One way of achieving this is could be through compliance with the

Policy CP6 Environmental Quality							
SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
							principles of Secured by Design which would be a material consideration when considering housing proposals. The need for more detailed design policies can be considered through the preparation of the Placemaking DPD.
Objective 6: Improve the availability and provision of training	Give everyone access to learning, training, skills and knowledge	N/A	N/A	N/A	This policy is not relevant to this SA Objective. Addressing skills issues and provision of education facilities are dealt with in the area based policies and Policy CP13 Infrastructure Provision.		n/a
Objective 7: Ensure communities have access to a wide range of employment opportunities, paid or unpaid	Give everyone in the region access to satisfying work opportunities, paid or unpaid Reduce poverty and income inequality	N/A	N/A	N/A	This policy is not relevant to this SA Objective. Provision of new employment opportunities is dealt with in the District Wide Spatial Strategy (DW1) and the area based policies.		n/a

Policy CP6 Environmental Quality							
SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
	Provide a diverse range of employment opportunities in a variety of sectors						
Objective 8: Enable local businesses to prosper	Increase the circulation of wealth within the local authority area Reduce vulnerability of the economy to climate change and harness opportunities arising	++	++	++	Policy CP6 aims to protect and enhance the historic environment, landscape and nature conservation – all of which contribute to the tourism sector within the district. The policy makes reference to addressing the impact of climate change with regards to nature conservation, landscape and heritage assets.		n/a
Objective 9: Increase availability of local produce and materials	Meet local needs locally Support local food producers	0	0	0	The supporting text for Policy CP6 acknowledges that the landscape of the district plays a role in local food production, however, overall it is considered that the policy has a neutral performance with regards to this SA Objective.		n/a

Policy CP6 Environmental Quality							
SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
Objective 10: Ensure everyone has access to high quality and affordable public transport and promote cycling and walking	Make public transport, cycling and walking easier and more attractive	+	+	+	The supporting text for Policy CP6 acknowledges that the landscape of the district plays a role in the wider green infrastructure network, which includes public rights of way. Although the policy does not mention public rights of way or the green infrastructure network (this is covered by Policy CP6 Green Infrastructure), the protection and enhancement of landscape and nature conservation assets will help to support the provision of an attractive network of walking and cycling paths across the district.		n/a
Objective 11: Reduce the need and desire to travel by car	Reduce the need/desire to travel by car	N/A	N/A	N/A	This policy is not relevant to this SA Objective. Reducing the need to travel by car is dealt with in the area-based strategies and the District Wide Spatial Strategy (DW1).		n/a
Objective 12: Protect and enhance local distinctiveness	Protect and enhance landscape and townscape Value and protect diversity and local distinctiveness including rural	++	++	++	Policy CP6 aims to protect and enhance the distinctive landscapes of the district, including those which are formally designated and those which have local importance. Policy CP6 also aims to implement high quality design which reinforces and contributes to the broad character of the built environment and creates attractive and inspiring places. This policy therefore will protect and enhance both landscapes and townscapes. The supporting		n/a

Consumption of resources and materials in new buildings is dealt with in Policy CP2 Sustainable Construction. The wise use of land is influenced by the spatial strategy (Policy DW1).		n/a
Objective 20: Promote waste management accordance with the waste hierarchy	Reduce waste not put to any use	N/A	N/A	N/A	This policy is not relevant to this SA Objective. Waste arisings due to construction and operation of new buildings is dealt with in Policy CP2 Sustainable Construction.		n/a

Policy CP6 Environmental Quality							
SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
(Reduce, Reuse and Recycle)							

Overall Commentary:

Policy CP6 is not relevant to a number of SA Objectives, but where it is relevant, the policy generally performs well. No potential negative or uncertain effects have been identified.

A number of potential major positive effects have been identified in relation to the following SA Objectives:

- Objective 8: Enable local businesses to prosper;
- Objective 12: Protect and enhance local distinctiveness;
- Objective 13: Protect and enhance the district’s historic, environmental and cultural assets;
- Objective 14: Encourage and protect habitats and biodiversity (taking account of climate change); and
- Objective 17: Ensure the development of sustainable and/or local energy sources and energy infrastructure

Potential minor positive effects have been identified in relation to the following SA Objectives:

- Objective 2: Improve the health and well-being of all communities;
- Objective 4: Promote stronger more vibrant and cohesive communities;
- Objective 5: Reduce anti-social behaviour, crime and the fear of crime;
- Objective 10: Ensure everyone has access to high quality and affordable public transport and promote cycling and walking; and
- Objective 18: Reduce vulnerability to, and manage flood risk (taking account of climate change).

No potential cumulative effects have been identified.

A recommendation has been put forward to improve the performance of the policy as follows:

- Policy CP6 would perform better if housing schemes were also required to comply with the principles of Secured by Design.

Policy CP7 Green Infrastructure							
SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
Objective 1: Improve accessibility to community facilities and local services	Help everyone access basic services easily, safely and affordably Increase access to and participation in community and cultural facilities and activities	+	+	+	Policy CP7 supports the protection, expansion and enhancement of the green infrastructure network across the district. The policy promotes a multi-functional green infrastructure network which could include pedestrian, cycle and bridle paths, allotments, orchards, SUDS and other habitats. This policy supports the achievement of this SA objective by potentially providing access to paths and green areas and encouraging participation in community and cultural activities.		n/a
Objective 2: Improve the health and well-being of all communities	Improve Health Reduce Health inequalities Promote healthy lifestyles, especially routine daily exercise	+	+	+	Policy CP7 supports the protection, expansion and enhancement of the green infrastructure network across the district. The policy promotes a multi-functional green infrastructure network which could include pedestrian, cycle and bridle paths, allotments, orchards, SUDS and other habitats. This policy supports the achievement of this SA objective by potentially providing access to paths and green areas, encouraging physical exercise, access to green space and potentially, the ability to grow food.		n/a
Objective 3: Meet identified needs for sufficient, high quality and affordable housing	Help make suitable housing available and affordable for everyone	N/A	N/A	N/A	This policy is not relevant to this SA Objective. The provision of housing is dealt with in policies CP9 and CP10.		n/a

Objective 20: Promote waste management accordance with the waste	Reduce waste not put to any use	N/A	N/A	N/A	This policy is not relevant to this SA Objective. Waste arising due to construction and operation of new buildings is dealt with in Policy CP2 Sustainable Construction.		n/a

Policy CP7 Green Infrastructure

SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
hierarchy (Reduce, Reuse and Recycle)							

Overall Commentary:

Policy CP7 is not relevant to a number of SA Objectives, but where it is relevant, the policy generally performs well. No potential negative or uncertain effects have been identified.

A number of potential major positive effects have been identified in relation to the following SA Objectives:

- Objective 4: Promote stronger more vibrant and cohesive communities;
- Objective 10: Ensure everyone has access to high quality and affordable public transport and promote cycling and walking;
- Objective 14: Encourage and protect habitats and biodiversity (taking account of climate change); and
- Objective 18: Reduce vulnerability to, and manage flood risk (taking account of climate change).

Potential minor positive effects have been identified in relation to the following SA Objectives:

- Objective 1: Improve accessibility to community facilities and local services;
- Objective 2: Improve the health and well-being of all communities;
- Objective 8: Enable local businesses to prosper;
- Objective 9: Increase availability of local produce and materials;
- Objective 12: Protect and enhance local distinctiveness; and
- Objective 13: Protect and enhance the district's historic, environmental and cultural assets.

A potential positive cumulative effect has been identified for 'SA Objective 14: Encourage and protect habitats and biodiversity (taking account of climate change)' through the provision of additional green infrastructure and achieving greater connectivity of habitats across the district and sub-region. This could benefit a variety of species in climate change adaptation, improve biodiversity and reduce habitat fragmentation.

	conditions etc)				been completed for the district and Level 2 SFRA for Bath, Keynsham, Radstock and Midsomer Norton.		
Objective 19: Encourage careful and efficient use of natural resources	Promote the conservation and wise use of land Keep water consumption within local carrying capacity limits (taking account of climate change) Minimise consumption and extraction of minerals	+	+	+	This policy safeguards the green belt and as such encourages the redevelopment of brownfield land within existing urban areas. This policy will have no effect on consumption or extraction of minerals or the use of water.		n/a
Objective 20: Promote waste management in accordance with the waste hierarchy (Reduce,	Reduce waste not put to any use	0	0	0	Some waste management facilities might be deemed inappropriate development within the green belt and therefore this policy could prevent the development of new sustainable waste management facilities. However, the need for such facilities or whether any new sustainable waste management facilities could be accommodated on non-green belt land is not known. PPG2 'Green Belts' makes it very clear that		n/a

Core Policies – Green Belt Core Policy							
SA Objectives	Detailed questions: Does the policy ...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
Reuse and Recycle)					developers will need to demonstrate very special circumstances before proposal may proceed. This will apply consideration of waste management facilities as it does any other inappropriate development until the terms of PPG2. Policy 5 in the JWCS also allocates a number of strategic sites appropriate for development for the management of residual waste. This includes Broadmead, Keynsham and the Former Fuller's Earth Works, Fosseway, Bath. Proposals for other waste management facilities will be considered in the context of the policies in the JWCS and any other relevant policies. A section relating to Waste is included in the Core Strategy which refers to the JWCS.		

Overall Commentary:	<p>The Green Belt Core Policy has a neutral performance against most of the SA objectives because it will not influence the subjects of those SA Objectives e.g. community cohesion and crime.</p> <p>One potential major positive effects have been identified in relation to the following SA Objective:</p> <ul style="list-style-type: none"> • Objective 12: Protect and enhance local distinctiveness <p>No potential cumulative negative or positive effects have been identified.</p> <p>A recommendation has been put forward in relation to the control of pollution, as follows:</p>
----------------------------	--

- The control of pollution will need to be addressed within the development management policies of the Place Making DPD.

Core Policies – Policy CP9 Affordable Housing and Policy CP10 Housing Mix							
SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
Objective 1: Improve accessibility to community facilities and local services	<p>Help everyone access basic services easily, safely and affordably</p> <p>Increase access to and participation in community and cultural facilities and activities</p>	N/A	N/A	N/A	Policies CP9 and CP10 are not relevant to this SA Objective. Accessibility to services and facilities is dealt with in the area-based chapters, the Infrastructure Provision Core Policy (CP12) and the District Wide Spatial Strategy (DW1).		n/a
Objective 2: Improve the health and well-being of all communities	<p>Improve Health</p> <p>Reduce Health inequalities</p> <p>Promote healthy lifestyles, especially routine daily exercise</p>	+ / ?	+ / ?	+ / ?	Policy CP10 provides for a mix of housing types for different needs including older people, disabled people, and those with other special needs. However, it is not clear how this will be implemented and whether private developers are expected to provide dwellings to meet the needs of older people, disabled people, and those with other special needs or whether this will be delivered by specialist developers such as those providing residential care.	Mitigation: The supporting text of the policy or the policy itself could make it clearer whether private developers will be expected to provide dwellings suitable for older people, disabled people, and those with other special needs. Developers could be asked to provide a certain proportion of dwellings which meet the Lifetime Homes	No change. Already states in policy that this applies to market housing and affordable. Lifetime Homes Standard considered as integral to social housing and in building for life standards so not mentioned as a specific requirement.

Overall Commentary:

Policies CP9 and CP10 are not relevant to the majority of the SA Objectives. Both policies perform very well with regards to 'SA Objective 2: Improve the health and well-being of all communities' but Policy CP10 has a mixed performance (minor positive and uncertain). with regards to 'SA Objective 3: Meet identified needs for sufficient, high quality and affordable housing' because it is not clear how housing that meets the needs of older people, disabled people and those with other special needs will be delivered.

Policy CP9 could have a minor negative effect with regards to 'SA Objective 4: Promote stronger more vibrant and cohesive communities' because it does not stipulate that affordable housing should be fully integrated into developments with market housing.

Mitigation measures are put forward to address the minor negative effect and the uncertainty, as follows:

- The supporting text of Policy CP10 or the policy itself could make it clearer whether private developers will be expected to provide dwellings suitable for older people, disabled people, and those with other special needs. Developers could be asked to provide a certain proportion of dwellings which meet the Lifetime Homes standards; and
- Policy CP 8 should stipulate that affordable housing is integrated within developments and does not differ from market housing in terms of aesthetics.

No potential cumulative effects were identified.

Since the appraisal was undertaken, clarification has been provided which offsets the uncertainty identified with regards to SA Objective 3. No change has been made to the policy or supported text to address this issue. In addition, the mitigation measure put forward to address a potential minor negative effect with regards to SA Objective 4 has led to a change to policy wording and this will result in a minor positive effect in the short, medium and long term with regards to SA Objective 4.

Core Policies – Gypsies, Travellers & Travelling Showpeople Policy							
SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
Objective 1: Improve accessibility to community facilities and local services	<p>Help everyone access basic services easily, safely and affordably</p> <p>Increase access to and participation in community and cultural facilities and activities</p>	+	+	+	This policy requires that sites for gypsies, travellers and travelling showpeople will have good access to local community services and facilities, including shops, schools, health facilities and public transport.		n/a

SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
hierarchy (Reduce, Reuse and Recycle)							may provide in the policy will unnecessarily lengthen it.

Overall Commentary:

This policy has a minor positive or neutral effect with regards to most of the SA Objectives, however, a small number of potential minor negative effects and uncertain effects have been identified. No potential cumulative effects have been identified.

The potential minor positive effects are in relation to the following SA Objectives:

- Objective 1: Improve accessibility to community facilities and local services;
- Objective 2: Improve the health and well-being of all communities;
- Objective 3: Meet identified needs for sufficient, high quality and affordable housing;
- Objective 5: Reduce anti-social behaviour, crime and the fear of crime;
- Objective 7: Ensure communities have access to a wide range of employment opportunities, paid or unpaid;
- Objective 10: Ensure everyone has access to high quality and affordable public transport and promote cycling and walking;
- Objective 11: Reduce the need and desire to travel by car;
- Objective 14: Encourage and protect habitats and biodiversity (taking account of climate change); and
- Objective 18: Reduce vulnerability to, and manage flood risk (taking account of climate change).

A potential minor negative effect has been identified as follows:

- Objective 20: Promote waste management accordance with the waste hierarchy (Reduce, Reuse and Recycle): This policy does not mention providing suitable space and / or facilities for the storage and collection of recyclables.

A potential uncertain effect has been identified as follows:

- Objective 15: Reduce land, water, air, light, noise pollution: This policy requires adequate services for foul water, surface water and waste disposal but does not include consideration of the storage of hazardous substances such as fuels or the vulnerability of groundwater and therefore an uncertain effect is recorded.

Mitigation is put forward to address the potential negative and uncertain effects identified as follows:

- The fifth bullet point should be reworded to read 'adequate services including foul and surface water and waste disposal and recycling can be provided'; and
- The fifth point should be reworded to read 'adequate services including foul and surface water and waste disposal can be provided with pollution control measures'.

Recommendations have been put forward to improve the performance of the policy as follows:

- In allocating sites for sites for gypsies, travellers and travelling showpeople, the council could consider opportunities to connect such sites to local district power schemes and could provide information to users of the sites relating to options for renewable and low carbon energy generation with are compatible with mobile accommodation.
- Bullet point 5 could be amended to include the word 'utilities'; and
- The first bullet point of the policy should be reworded to read 'good access (by foot or cycle) to local community services and facilities...'

Since the policy was appraised a number of recommendations and one of the mitigation measures have been taken on board within the policy and this has improved the performance of the policy in light of the SA Objectives. In particular, the performance against 'SA Objective 15: Reduce land, water, air, light, noise pollution' is improved to minor positive over the short, medium and long terms.

Core Policies – Policy CP 12 Centres and Retailing							
SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
Objective 1: Improve accessibility to community facilities and local services	<p>Help everyone access basic services easily, safely and affordably</p> <p>Increase access to and participation in community and cultural facilities and activities</p>	+	+	+	Policy CP12 aims to maintain and enhance existing centres and ensure that centres have a high level of accessibility by walking, cycling and public transport. A number of local centres have been removed from the list which was proposed in the Spatial Options document as they do not match the definition of local centres in PPS4. Retail uses at these locations will continue to be protected though Local Plan Policy S.9. Culture, art, leisure, entertainment and tourism uses will be located within or adjoining the centres.		n/a
Objective 2: Improve the health and well-being of all communities	<p>Improve Health</p> <p>Reduce Health inequalities</p> <p>Promote healthy lifestyles, especially routine daily exercise</p>	?	?	?	It would be beneficial for communities if health facilities were also located in accessible centres and that the co-location of health facilities with other uses will help to strengthen community cohesion. The policy does not exclude health facilities from centres and states that uses which contribute to maintaining the vitality, viability and diversity of centres will be encouraged. Such community facilities would support these objectives, however, the supporting text	Mitigation: the supporting text of Policy CP12 could make it clearer that the policy will support the provision of health facilities within centres as well as other uses such as employment.	Community facilities added to Policy CP12: Retail development, offices, leisure and entertainment uses, community facilities, arts, culture and tourism uses will be primarily located within, or where appropriate, adjoining the centres in the identified hierarchy of centres. Centres will also be the focus for higher density forms of residential development provided the

SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
crime					encourage entertainment and culture.	Placemaking DPD.	
Objective 6: Improve the availability and provision of training	Give everyone access to learning, training, skills and knowledge	N/A	N/A	N/A	Education and training provision is not relevant to this Core Policy.		n/a
Objective 7: Ensure communities have access to a wide range of employment opportunities , paid or unpaid	Give everyone in the region access to satisfying work opportunities , paid or unpaid Reduce poverty and income inequality Provide a diverse range of	+	+	+	This policy supports retail provision within existing centres and therefore supports the retail sector. The policy also supports other uses such as tourism, leisure, arts, culture and entertainment and therefore indirectly supports these sectors too.		n/a

Core Policies – Policy CP 12 Centres and Retailing							
SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
	employment opportunities in a variety of sectors						
Objective 8: Enable local businesses to prosper	Increase the circulation of wealth within the local authority area Reduce vulnerability of the economy to climate change and harness opportunities arising	++	++	++	Policy CP12 supports office development within centres which is currently lacking in the district, particularly in Bath. Policy CP12 also supports a variety of sectors including retail, culture and tourism which should enable local businesses in these sectors to prosper.		n/a
Objective 9: Increase availability of local produce and materials	Meet local needs locally Support local food producers	?	?	?	The policy and the supporting text do not mention provision of space for street traders or markets such as farmers markets. It is therefore not clear whether these uses are supported within the centres identified.	Mitigation: the policy or supporting text should identify whether markets and street trading are supported within suitable centres.	Policy CP12 amended: Retail development, offices, leisure and entertainment uses, markets, community facilities, arts, culture and tourism uses will be primarily located within, or where appropriate, adjoining the centres in the identified hierarchy of centres. Centres will

Core Policies – Policy CP 12 Centres and Retailing							
SEA/SA Objectives	Detailed questions: Does the policy / proposal... etc)	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
Objective 19: Encourage careful and efficient use of natural resources	Promote the conservation and wise use of land Keep water consumption within local carrying capacity limits (taking account of climate change) Minimise consumption and extraction of minerals	N/A	N/A	N/A	This SA objective is not relevant to this policy. Consumption of resources and materials in new buildings is dealt with in Policy CP2 Sustainable Construction. The wise use of land is influenced by the spatial strategy (Policy DW1).		n/a
Objective 20: Promote waste management accordance with the waste hierarchy	Reduce waste not put to any use	N/A	N/A	N/A	This SA objective is not relevant to this policy. Waste arisings due to construction and operation of new buildings is dealt with in Policy CP2 Sustainable Construction.		n/a

Core Policies – Policy CP 12 Centres and Retailing							
SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Med term	Long term	Commentary	Mitigation or enhancement	B&NES response:
(Reduce, Reuse and Recycle)							

Overall Commentary:

Policy CP12 is not relevant to a number of SA Objectives, but where it is considered relevant, it generally performs well.

Major positive effects have been identified in relation to the following SA Objectives:

- Objective 1: Improve accessibility to community facilities and local services;
- Objective 4: Promote stronger more vibrant and cohesive communities;
- Objective 8: Enable local businesses to prosper;
- Objective 11: Reduce the need and desire to travel by car;
- Objective 12: Protect and enhance local distinctiveness; and
- Objective 13: Protect and enhance the district's historic, environmental and cultural assets.

Minor positive effects were identified in relation to the following SA Objectives:

- Objective 7: Ensure communities have access to a wide range of employment opportunities, paid or unpaid; and
- Objective 15: Reduce land, water, air, light, noise pollution (with uncertainty).

Uncertainty was recorded with regards to the following SA Objectives:

- Objective 2: Improve the health and well-being of all communities;
- Objective 5: Reduce anti-social behaviour, crime and the fear of crime; and
- Objective 9: Increase availability of local produce and materials.

Mitigation is put forward to address the uncertainty identified:

- The supporting text of Policy CP12 could make it clearer that the policy will support the provision of health facilities within centres as well as other uses such as employment;
- Any controls on the night time economy which are considered necessary should be contained within the policies of the Placemaking DPD; and
- The policy or supporting text should identify whether markets and street trading are supported within suitable centres.

No potential cumulative effects have been identified.

- Since the policy has been appraised, changes have been made to the policy which will result in the following residual effects:
- SA Objective 2 – minor positive in the short, medium and long term;
 - SA Objective 5 – neutral performance in the short, medium and long term. BANES will address crime and anti-social activity issues within the Placemaking DPD; and
 - SA Objective 9 – minor positive in the short, medium and long term.

Core Policies – Infrastructure Provision Policy							
SEA/SA Objectives	Detailed questions: Does the policy / proposal...	Short term	Medium term	Long term	Commentary	Mitigation or enhancement	B&NES response:
Objective 1: Improve accessibility to community facilities and local services	<p>Help everyone access basic services easily, safely and affordably</p> <p>Increase access to and participation in community and cultural facilities and activities</p>	+	+	+	This policy will ensure that identified social, physical and green infrastructure required to meet the demands of new developments is delivered in a timely manner and therefore should ensure such facilities are accessible.		n/a
Objective 2: Improve the health and well-being of all communities	<p>Improve Health</p> <p>Reduce Health inequalities</p> <p>Promote healthy lifestyles, especially</p>	+	+	+	This policy will ensure that identified social, physical and green infrastructure required to meet the demands of new developments is delivered in a timely manner. Social infrastructure could include health facilities if there is an identified need and other physical and/or green infrastructure could promote physical activity. The provision of healthcare, recreational and leisure facilities are mentioned in the supporting		n/a
