

Bath & North East Somerset Green Space Strategy

Appendix A GIS Dataset and Site Identification Maps

Appendix A

Introduction

This appendix contains two tables alphabetically and numerically listing the green spaces mapped within each settlement of Bath and North East Somerset.

The first table lists sites recorded in Bath, Keynsham, Norton Radstock and the Parish areas and then within these geographical areas sites are listed alphabetically by ward or parish. The second table lists all sites in numerical order irrespective of their geographical location.

In order to locate a site;

- find the ward / parish
- note the reference number from the left hand column
- locate the site from the reference number on the site plans at the back of this appendix

An alternative way to locate a site is to use the plans at the back of the appendix and note its unique identification number and then check its name by referring to the numerical list in the second table.

Glossary of terms

Ref – the unique site identification number used throughout the strategy

Site – the site name as used in the strategy

Location – where the site is located within the Bath and North East Somerset area (B=Bath, K=Keynsham, N=Norton Radstock, P= rural parish)

Ward / Parish – is the name of the ward or parish to which the site lies in

Type – indicates the type of green space (F=formal green space, N=natural green space, A=allotments)

Hierarchy – indicates the significance of the site (D=doorstep, L=local, N=neighbourhood, B= district, PL= parish local, PN=parish neighbourhood). The definition of a parish neighbourhood site is either a site which fits the size criteria or the main (or only) green space in a parish. Therefore there are some very undersized sites in this category but generally they all perform the function of a neighbourhood site i.e. centre of community focus.

An * after the letter indicates that the space is smaller than the minimum size indicated in the proposed standards for a space of that level of the hierarchy.

The sum column indicates the total of each type of space in each ward / parish.
