

Appendix 10

Broadband speeds in Clutton

According to a Government Policy document issued 27th February 2013, it is their aim that broadband speeds be increased with "95% of the UK receiving far greater speeds (at least 24Mbps) by 2017".

A survey was carried out in October 2014 to check the speeds available and the results showed that none exceeded 6.82/.534Mps (upload/download). The map shows the speed and locations of the measurement.

The full Government policy details can be found at
