

PV your inner slope!

top tips for a
greener future

5 more ambitious things you could do to make your home fit for the future

- Replace window with double glazing* or install secondary glazing
- Bin old bulbs and light up with energy efficient LED's and CFL's
- Replace your boiler if it is more than 15 years old
- Switch to low carbon or renewable energy, such as solar panels* or a wood burning stove
- Insulate interior or exterior walls*

* Advice should be sought for listed buildings and properties within the World Heritage Site and Conservation Areas
