

**Recycling & recovery end use register 2019-20**

In 2019-20 over 47,000 tonnes of Bath & North East Somerset residents waste was reused and recycled.

All of the material shown in this register is collected by Bath & North East Somerset Council and genuinely sent for reuse, recycling, or recovery. Details on the end outlets and treatment processes used are set out in the table below.

All the material collected for reuse and recycling is sent for recycling within the UK where possible, however, due to demand or market availability, it is sometimes necessary to export some materials overseas. The percentage of materials exported for recycling and reuse 2019-20 was 1.1%.

In total just over 13% of the 64,664 tonnes diverted away from landfill was exported. The majority of this exported waste has been removed from residents' weekly bin waste at difference facilities in the region. We sent 22,859 tonnes of black bag waste to these facilities in 2019-20, where it was either processed at Energy from Waste facilities in the UK or exported for use in energy recovery in Europe.

**Data on the carbon impact of all the waste we divert away from landfill.**

This data does not represent a detailed carbon impact assessment for waste management in Bath & North East Somerset. The figures are based on national average greenhouse gas factors for CO<sub>2</sub> (kg CO<sub>2</sub>/tonne savings versus landfill) for England provided by Eunomia.

These national factors are not calculated from detailed life cycle analysis and do not take into account different collection methods, treatment processes or transport.

In 2019-20, over 12,573 tonnes of CO<sub>2</sub> equivalent in emissions were avoided as a result of efforts made by residents of Bath & North East Somerset residents in recycling.

The following tables show a breakdown of the tonnes of material collected by each service and the carbon impact as described above, the amount sent to individual reprocessors and the materials final end use.

NB. The following represents only the Household Waste (also including C&D waste) diverted from landfill in Bath & North East Somerset

KERBSIDE COLLECTIONS	RECYCLED (TONNES)	ENERGY RECOVERY (TONNES)	REUSED (TONNES)	CARBON SAVED (TONNES CO <sub>2</sub> EQUIVALENT)	COLLECTION CONTRACTOR	REPROCESSOR	EXPORTED (TONNES)	TREATMENT PROCESS AND END USE
Aluminium cans	13.50			117.40	Bath & North East Somerset Council	Newport Paper Company Aston House, 3 Springfield Industrial Estate, Newport, Shropshire, TF10 7NB <a href="http://www.newportrecycling.co.uk">www.newportrecycling.co.uk</a>		Aluminium cans are first shredded before going through a cleaning process. They are then melted to produce molten liquids that are then poured into casts. The aluminium casts can then be made into new aluminium cans while the steel casts can go into construction, cars, bikes and many other products.
	41.44			360.38		Thamesdown Recycling, Kingshill Recycling Centre, Swindon SN6 6JR <a href="http://www.thamesdownrecycling.co.uk">www.thamesdownrecycling.co.uk</a>		
Steel cans	143.26			262.06	Bath & North East Somerset Council	Newport Paper Company Aston House, 3 Springfield Industrial Estate, Newport, Shropshire, TF10 7NB <a href="http://www.newportrecycling.co.uk">www.newportrecycling.co.uk</a>		Steel cans are first shredded before going through a cleaning process. They then go through a melting process to produce molten liquids that are then poured into casts to make new products.
Car Batteries	8.72			4.248099096	Bath & North East Somerset Council	G&P Batteries, Darlaston, West Midlands <a href="http://www.g-pbatt.co.uk/index.html">http://www.g-pbatt.co.uk/index.html</a>		Separated into fractions and reprocessed into new batteries or reused as raw materials ie. Scrap metal and plastic. Water that is removed from the battery is chemically treated to neutralise any acids present.
Cardboard	3,570.90			1.22	Bath & North East Somerset Council	D S Smith Recycling, Avon Mill Lane, Bristol <a href="http://www.dssmith.com/recycling">www.dssmith.com/recycling</a>		The cardboard is taken to a treatment plant where it is turned into a pulp to separate the fibres, ink and other elements that may be present. From here the processes to eliminate the contaminants such as inks, plastics, staples begins and the final card product can be made. It is dried and wound onto large reels where it is then sent to suppliers to be made into new products.
Clothing & Footwear	58.82			£352.34	Bath & North East Somerset Council	Wilcox Reclaimers, Belkroy Road Bilston w.m. WV14 7NH <a href="https://jnpwilcox.co.uk/about-us/our-team/">https://jnpwilcox.co.uk/about-us/our-team/</a>	52.94	Your recycled textiles and fabrics are sent to a processing plant where they go through several sorting and grading processes to identify the highest grade. Those that are deemed high quality are then baled to be Exported to Africa, Eastern Europe and Indian sub-continent where they will continue to be used as clothes. Remaining items of a lesser grade will cut down and can be recycled into industrial wipes or used for fibre reclamation.
Food Waste	6,862.00			1111.46	Bath & North East Somerset Council	GENeco, Wessex Water Composting Facility, Avonmouth <a href="http://www.geneco.uk.com/#">http://www.geneco.uk.com/#</a> <a href="https://youtu.be/x-HEdAF48ek">https://youtu.be/x-HEdAF48ek</a> ;		Any plastics and packaging is mechanically removed once tipped, the waste is then passed through a shredder and digested for xx days to produce a biofertiliser for use on brown field sites.
Garden Waste	2,951.58			124.704255	Bath & North East Somerset Council	RM Penny, On farm composting at Green Ore <a href="http://www.pennyplant.com/transfer-station/green-waste-recycling/">http://www.pennyplant.com/transfer-station/green-waste-recycling/</a>		Your garden waste is taken to a composting site where the first part of the process is to remove any unwanted items before it is then shredded. From here nature takes over. The enzymes and bacteria that are present begin to breakdown the garden waste, eventually turning it into nutrient-rich compost.
	2,640.67			111.5683075		Phoenix Green Solutions Mayhill Industrial Estate Frampton Cotterell South Glos BS36 2NS		
Mixed glass	5,403.16			1088.41	Bath & North East Somerset Council	URM (UK)Ltd, 49 Ludgate Crescent, Langthwaite Business Park, South Kirkby, WF9 3NR <a href="https://www.urmgroup.co.uk/consumer-education/#1539831229443-6457d422-1b34">https://www.urmgroup.co.uk/consumer-education/#1539831229443-6457d422-1b34</a>		Glass goes through a series of processes to remove any waste products, such as paper, metals and other impurities that would jeopardise the quality of the final product. The glass often then goes through a colour detection process before being sampled to ensure it meets the required specifications. The final glass product is known as cullet which is then sent off to manufacturers to produce new glass bottles and jars.
Household Batteries	9.81			4.78	Bath & North East Somerset Council	G&P Batteries, Darlaston, West Midlands <a href="http://www.g-pbatt.co.uk/index.html">http://www.g-pbatt.co.uk/index.html</a> <a href="https://www.mercuryrecycling.co.uk/recycling/battery-recycling">https://www.mercuryrecycling.co.uk/recycling/battery-recycling</a> <a href="https://www.recycle-more.co.uk/how-is-it-recycled-battery-recycling">https://www.recycle-more.co.uk/how-is-it-recycled-battery-recycling</a>		Separated into fractions and reprocessed into new batteries or reused as raw materials ie. Scrap metal and plastic. <a href="https://www.recycle-more.co.uk/how-is-it-recycled-battery-recycling">https://www.recycle-more.co.uk/how-is-it-recycled-battery-recycling</a>
Paper	3,129.95			1069.96	Bath & North East Somerset Council	Palm Paper, Saddlebow Paper Mill Poplar Ave, Kings Lynn, Norfolk PE34 3AL <a href="http://www.palmrecycling.co.uk/">http://www.palmrecycling.co.uk/</a>		The waste paper is taken to a treatment plant where it is turned into a pulp to separate the fibres, ink and other elements that may be present. From here the processes to eliminate the contaminants such as inks, plastics, staples begins and the pure paper product can be made. It is dried and wound onto large reels where it is then ready to be made into new products like your morning newspaper.
Mixed Plastics	421.98			494.15	Bath & North East Somerset Council	Biffa Waste Services Westgate Aldridge Walsall WS9 8EX	134.000	Plastics require several sorting processes that both remove contamination and identify the types of plastics they are made from. They are then cleaned, separated and arranged into varying colour groups. The plastics are now ready to be either melted down ready to be made into other products or shredded into flakes and granules that will be sent off to suppliers who can use them to create new bottles, bags and even clothes.
	983.57			1151.79	Bath & North East Somerset Council	J & A Young (Jayplas), Unit 15, Saxon Way, Oakley Hay Industrial Estate, Corby NN18 9EX <a href="http://www.jayplas.com/what-we-do/recycling/mixed-bottle-plastic-sorting.html">http://www.jayplas.com/what-we-do/recycling/mixed-bottle-plastic-sorting.html</a>		Approximately 31.5% of the plastics sent to Biffa are exported to Spain for processing
Mixed cans and plastics	446.58				Bath & North East Somerset Council	SUEZ Resource and recovery Park, Merebank Rd, Bristol, BS11 6AQ		Aluminium cans are first shredded before going through a cleaning process. Both aluminium and steel go through their own melting process to produce molten liquids that are then poured into casts. The aluminium casts can then be made into new aluminium cans while the steel casts can go into construction, cars, bikes and many other products used in the steel industry. Plastics are sorted, graded and shredded. Recycled into new plastic items including pipes, films, compost bins and fleece jackets
	292.06			337.61		J & A Young (Jayplas), Unit 15, Saxon Way, Oakley Hay Industrial Estate, Corby NN18 9EX <a href="http://www.jayplas.com/what-we-do/recycling/mixed-bottle-plastic-sorting.html">http://www.jayplas.com/what-we-do/recycling/mixed-bottle-plastic-sorting.html</a>		
Mixed cans	166.63				Bath & North East Somerset Council	Biffa Waste Services Westgate Aldridge Walsall WS9 8EX		Aluminium cans are first shredded before going through a cleaning process. Both aluminium and steel go through their own melting process to produce molten liquids that are then poured into casts. The aluminium casts can then be made into new aluminium cans while the steel casts can go into construction, cars, bikes and many other products used in the steel industry.
	313.85					J & A Young (Jayplas), Unit 15, Saxon Way, Oakley Hay Industrial Estate, Corby NN18 9EX <a href="http://www.jayplas.com/what-we-do/recycling/mixed-bottle-plastic-sorting.html">http://www.jayplas.com/what-we-do/recycling/mixed-bottle-plastic-sorting.html</a>		

Engine Oil	4.01			4.70	Bath & North East Somerset Council	West Oils Environmental, Gloucester <a href="https://www.westoils.com">https://www.westoils.com</a>		Reprocessed into low-grade fuel oil for asphalt plants and generators
Toner Cartridges			1.42	No information available	Bath & North East Somerset Council	Safykleen, 202, Longmead Road Bristol BS16 7FG		Old cartridges are assessed to clarify those that can be re-filled and re-used. Components that fail these tests are removed and recycled into other products.
Mixed materials (from flat collections)	19.92			No information available	Bath & North East Somerset Council	Suez, Bristol Resource Recovery Park, Merebank Road, Bristol BS11 8AQ		These materials are processed at a Materials Recovery Facility where they are separated out and baled to be sent on to other processors
Small WEEE	47.88			8.64	Bath & North East Somerset Council	Sims, Gatton Road, Bristol BS2 9SH <a href="https://www.simsrecycling.com/recycle/">https://www.simsrecycling.com/recycle/</a>		Small electricals are broken down and put through several processes to ensure their individual components are removed and recycled. These components can consist of plastics, metals, motors and batteries.
